

A large yellow mining truck is the central focus of the image. A worker wearing a blue hard hat and safety vest stands on a metal platform on the side of the truck. The truck is parked on a dirt surface, and the background shows a hilly, arid landscape under a clear blue sky with some light clouds. The truck's massive tires and heavy-duty construction are clearly visible.

Taseko Mines Limited

2008 Annual Report

Building wealth through developing and operating major copper and gold mines

As I wrote the Message to Shareholders twelve months ago, 2008 was off to an excellent start as copper prices were over US\$3.50 per pound and production at Gibraltar was steadily increasing. We were anticipating another strong year of earnings and cash flow for the Company and continued success on moving our Prosperity Project through the Environmental Assessment Process.

No one expected the once in a lifetime collapse of the global financial markets that began to appear last summer and our optimism for a successful 2008 quickly evaporated. In a matter of weeks the copper price plunged by nearly one-half while at the same time credit markets and our ability to access capital disappeared.

The financial crisis was shocking for many companies worldwide and many mining companies, in particular have not survived, not only as a result of the metal price declines but also their inability to access credit.

Taseko management, however, heading into 2009 responded decisively and effectively to both the decline in copper and molybdenum prices and the tight credit markets.

In the first three months of 2009,

- Demonstrating the operating ability and the capacity of the newly expanded concentrator, Gibraltar produced 19.9 million lbs of copper concentrate in the first quarter of 2009.
- Our operational staff at Gibraltar reduced total cash costs, including off property costs by the end of March to US\$1.18 per pound after a series of rigorous cost cutting initiatives.
- In February our financial department closed a US\$30 million term loan facility with Credit Suisse, a major international bank. The funds from the loan are to be used for the completion of key capital projects. This debt package was one of only a few completed for any mining company during the financial crisis.
- Executive Management took advantage of a strong copper price, and in April of this year initiated a hedging program for 50% of Gibraltar's production for 2009. As a result, 30 million pounds of copper has been hedged between May and December, with a minimum price of US\$1.88 per pound. This program will protect our cash flows for this year.
- Construction recommenced on the Gibraltar Phase II expansion project with the goal of completing the upgrades within the next 12 months.

Russell Hallbauer
President and CEO

SAFETY

At Taseko, employee health and safety is the foundation of every thing we do. Our safety record at the Gibraltar Mine has improved year-over-year but our goal is zero reportable incidents and we feel this is achievable. First Aid frequencies, a key indicator of safety performance, decreased by 42% in 2008, unfortunately, the severity of incidents increased over the same period, as evidenced by a rise in Lost Time Injury frequency.

We will continue to aggressively work on improvement in both of these areas in 2009.

In mid-2008, the SafeStart safety program was implemented at Gibraltar. The purpose of this course is to train our employees on how to prevent the mistakes or errors that are the root cause of safety incidents. Our goal with this program, over the next two years, is to reduce the rate of acute injuries by 50%.

ENVIRONMENT

British Columbia, the province in which we operate, has some of the most stringent environmental guidelines in the world. I am happy to report that in the last two years, our Gibraltar Mine has had no reportable environmental incidents. As well, 25 hectares of tailings beach were seeded and a number of our rock dumps were re-sloped as part of our ongoing reclamation plan.

Taseko will employ its strict environmental policies and procedures as we move forward with Prosperity, during both its construction and operation.

EMPLOYEES

The collapse of global commodity markets and the necessity to revise our mine plan had a serious impact on many of our employees at Gibraltar. It is never an easy decision to reduce manpower; however, it was necessary to ensure the continued operation of the mine. In late 2008 and early 2009, we laid off 145 employees in an immediate effort to reduce operating costs, an initiative that had a significant impact on Gibraltar's ability to produce copper at a cost that would ensure the mine remained profitable.

The mine currently employs 330 people and we expect to remain at those levels for the foreseeable future.

GIBRALTAR

Moving ahead through 2009, key initiatives at Gibraltar will include increasing copper and molybdenum recovery rates and completing the Phase II capital expansion which will result in increases in both copper and molybdenum metal production. At the same time, we will continue to address productivity initiatives identified in an operational review program provided from an external productivity audit. This work will continue to help reduce costs at Gibraltar and ensure we remain competitive in the years ahead.

Following the completion of the Phase I expansion in 2008, the production capacity of the Gibraltar concentrator was increased to 46,000 tons per day, which will yield approximately 100 million pounds of contained copper metal per year. To achieve our metal production forecast, mine operating staff are working on concentrator throughput and metallurgical recoveries. Our targeted production for 2009 is 80 million pounds of copper. In the first quarter, the mine produced nearly 20 million pounds of copper indicating we are on target to achieve that goal.

Molybdenum is a by product at Gibraltar and the revenue generated is a key component of the cost structure. Engineering designs are currently being completed which will allow us to upgrade the molybdenum circuit and we expect to have a plan in the coming months. Targeted molybdenum production for 2009 is 800,000 pounds. In the first quarter, we produced 187,000 pounds of molybdenum -- on pace to achieve the annual target.

Over the past two years, we have invested \$250 million at Gibraltar to modernize and expand production at this key asset. Investments have included more than \$100 million in upgrades to the concentrator, including a new 34-foot SAG mill and complete replacement of the flotation and regrind circuit. In addition, more than \$50 million was spent on new mining equipment, including a new 60-yard mining shovel, seven new 240-ton haulage trucks and one production drill, all these investments will result in decreased operating costs over the longer-term. In the Fall of 2008, when global credit and commodity markets crashed, we suspended our expansion plans, although they were near completion. Following the closing of the Credit Suisse loan facility in February and the stabilization in commodity markets, management is again proceeding with those expansion activities. Concerned that there may still be difficult times before the global economy recovers, we are moving ahead with capital spending very cautiously. We will continue to advance the Phase II project with the goal of completing it within the next 12 months.

PROSPERITY

We are also actively working on our other 100% wholly-owned asset, the Prosperity gold-copper project. After years of collecting data and completing the required environmental studies, our Environment Assessment Report was presented to the British Columbia Provincial Government in March 2009. This was a significant step forward, both for the Company and the Project, as the timeline for completion is 180 days, as mandated by law. We are more confident than ever that we will receive environmental approvals, both Provincial and Federal, in October of this year.

Raising the \$800 million for this project will be a major task for our finance team. We started the process many months ago and continue to pursue a number of different options. Discussions with potential joint venture partners were initiated last year and are ongoing. We have also engaged a number of banks which have expressed an interest in working with Taseko to finance the debt portion of the capital investment.

We expect that all necessary permits and financing will be in place by early 2010, and we will begin construction in the Spring. Production could commence by mid-2012, after an approximate 24-month construction period.

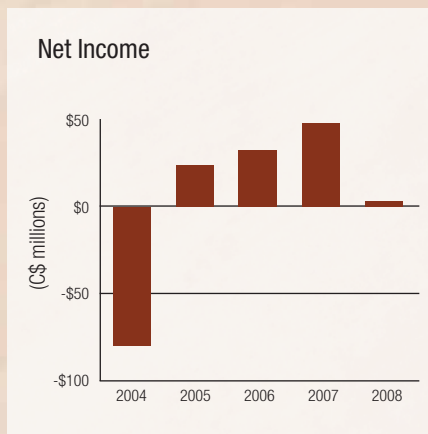

OUTLOOK

Looking ahead, I am confident that the strategy we have in place will allow the Company to navigate in these turbulent times. Our Gibraltar Mine is very profitable at current metal price levels, as exhibited by our cost structure, and can remain profitable through the copper cycle. We will continue to dedicate our energies on extracting value from both our key assets, Gibraltar and Prosperity and by the end of the year we hope we will be in a position to announce a production decision on building our Prosperity Mine.

I would like to thank our employees for their commitment and patience over the past few months and our suppliers and shareholders for their ongoing support, especially over the past year. I believe the strategy we have in place will create long-term value for all of our shareholders, adding to a bright future for this Company.

MANAGEMENT'S DISCUSSION AND ANALYSIS**

1.1 Date

This Management Discussion and Analysis ("MD&A") should be read in conjunction with the audited consolidated financial statements of Taseko Mines Limited ("Taseko", or the "Company") for the fifteen months ended December 31, 2008 and twelve months ended September 30, 2007, prepared in accordance with Canadian generally accepted accounting principles, and is publicly available on SEDAR at www.sedar.com.

In October 2008, the Company announced that it would change its year end from September 30 to December 31.

This MD&A is prepared as of March 26, 2009. All dollar figures stated herein are expressed in Canadian dollars, unless otherwise specified.

This discussion includes certain statements that may be deemed "forward-looking statements". All statements in this discussion, other than statements of historical facts, that address future production, reserve potential, exploration drilling, exploitation activities and events or developments that the Company expects are forward-looking statements. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Factors that could cause actual results to differ materially from those in forward-looking statements include market prices, exploitation and exploration successes, continued availability of capital and financing and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in the forward-looking statements.

Cautionary Note to Investors Concerning Estimates of Measured and Indicated Resources

This discussion uses the terms 'measured resources' and 'indicated resources'. The Company advises investors that while those terms are recognized and required by Canadian regulations, the U.S. Securities and Exchange Commission does not recognize them. **Investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be converted into reserves.**

Cautionary Note to Investors Concerning Estimates of Inferred Resources

This discussion uses the term 'inferred resources'. The Company advises investors that while this term is recognized and required by Canadian regulations, the U.S. Securities and Exchange Commission does not recognize it. 'Inferred resources' have a great amount of uncertainty as to their existence, and as to their economic and legal feasibility. It cannot be assumed that all or any part of a mineral resource will ever be upgraded to a higher category. Under Canadian rules, estimates of Inferred Mineral Resources may not form the basis of economic studies, except in rare cases. **Investors are cautioned not to assume that any part or all of an inferred resource exists, or is economically or legally mineable.**

FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008 MANAGEMENT'S DISCUSSION AND ANALYSIS

1.2 Overview

Taseko is a mining and mineral exploration company with one operating mine and three exploration projects, all located in British Columbia, Canada. These are the Gibraltar copper-molybdenum mine, the Prosperity gold-copper property, the Harmony gold property and the Aley niobium property.

In October 2008, the Company announced that it would change its year end from September 30 to December 31. As a result, this management discussion and analysis deals with the transition period, comparing the three months ending December 31, 2008 with the three months ending December 31, 2007 and the fifteen month ending December 31, 2008 with the twelve months ending September 30 2007. In order to provide more meaningful information on the current status of the Gibraltar Mine, the report will also include information illustrating unaudited operating results in January and February of the current quarter.

In the fifteen months ending December 31, 2008, Taseko focused on commissioning the first phase of the expanded concentrator and completing other production improvements at the Gibraltar mine, advancing the attainment of a Project Approval for the Prosperity project, and reviewing potential acquisitions to provide for further corporate growth.

Deterioration of global economic conditions during the latter part of the 2008 calendar year resulted in a significant weakening of base metal prices and high volatility in the exchange traded commodity prices. As a result of the economic crisis and concurrent decrease in demand for copper, the London Metal Exchange price declined from US\$2.90 per pound at the end of September 2008 to US\$1.32 per pound at the end of December 2008. As well as affecting the price received during the quarter, the rapid decline in copper prices generated significant negative provisional pricing adjustments for copper sales in the quarter ended December 31, 2008. Copper prices have improved in the first quarter of 2009, which will result in positive price adjustments.

Management has been monitoring the effects of the current economic and credit conditions on the Company's business and is reviewing discretionary and project capital spending and operating costs. Plans to move forward with the Harmony and Aley Projects in 2009 have been deferred, as has the Phase 3 expansion of the concentrator at the Gibraltar mine.

A new 24-month mine plan implemented in November 2008 for the Gibraltar mine will sustain a 45,000 tons per day ("tpd") mill throughput while mining at a significantly reduced strip ratio, which will result in lower mine equipment hours and manpower requirements. Maintaining mill feed at planned grades and reduced strip ratio is possible as a result of the pre-stripping investment that was made during 2007 and early 2008. This new operational plan along with declining input costs, a weaker Canadian dollar and the finalization of remaining Phase 2 expansion items indicate total cash costs (onsite and offsite costs) will decline to approximately US\$1.15 per pound.

The Gibraltar mine achieved production of 18.8 million pounds of copper in the quarter ended December 31, 2008, which represented a 31% increase over the 14.4 million pounds produced in the same quarter in 2007 as a result of significantly improved mill throughput. Molybdenum production was 0.2 million

**FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008
MANAGEMENT'S DISCUSSION AND ANALYSIS**

pounds for the quarter ended December 31, 2008 as compared to 0.3 million pounds in the quarter ended December 31, 2007.

The Prosperity Project continues to have robust economics considering current and expected future gold and copper prices and the Environmental Assessment process is entering its final stages. The Provincial Environmental Assessment is mandated by law to be completed 180 days following its acceptance as complete, which occurred on March 13, 2009.

Non-GAAP Measures

The table and discussion below includes certain non-GAAP performance measures that do not have any standardized meaning prescribed by GAAP and may not be comparable to similar measures presented by other companies. The Company believes that these measures are commonly used, in conjunction with conventional GAAP measures, by certain investors to enhance their understanding of the Company's performance. The Company's use of these non-GAAP measures is intended to provide additional information that should not be considered in isolation or as a substitute for performance measures prepared in accordance with GAAP.

Financial Results and Current Market Conditions

(in millions of dollars)	Fifteen months ending December 31, 2008	Twelve months ending September 30, 2007	Three months ending December 31, 2008	Three months ending December 31, 2007
Gross Revenues ¹	258.6	216.1	32.5	43.7
Gross Cost of Sales ²	194.7	109.5	47.5	25.0
Amortization	7.4	3.2	2.0	0.7
Unadjusted Operating Profit (Loss)	56.5	103.4	(17.0)	18.0
Adjustments:				
Quotational Pricing	(26.9)	2.3	(21.9)	1.2
Inventory Adjustment	(1.5)	–	(1.5)	–
Operating Profit as reported	28.1	105.7	(40.4)	19.2

¹ Gross Revenues is a non-GAAP measure defined as revenues before quotational pricing adjustments.

² Gross Cost of Sales is a non-GAAP measure defined as cost of sales before inventory net realizable value adjustments.

For the fifteen months ended December 31, 2008, Taseko generated an operating profit before quotational period and inventory adjustments of \$56.5 million compared to \$103.4 million during the twelve months ended September 30, 2007. Additionally, during the fifteen-month period, Taseko generated cash from operating activities of \$46.9 million as compared to \$86.0 million for the twelve month period ended September 30, 2007.

A \$26.9 million negative pricing adjustment and a \$1.5 million negative inventory adjustment was recorded in the fifteen months ended December 31, 2008 related to the rapid deterioration in base metal

**FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008
MANAGEMENT'S DISCUSSION AND ANALYSIS**

prices, including copper and molybdenum, in the quarter ended December 31, 2008. The result of these adjustments and other expenses was net earnings after tax of \$3.5 million for the fifteen months ended December 31, 2008 as compared to net earnings after tax of \$48.3 million for the year ended September 30, 2007. The corresponding loss for Taseko for the three months ended December 31, 2008 was \$39.6 million as compared to net earnings after tax of \$16.2 million for the three months ended December 31, 2007.

Under the Company's concentrate sales contracts, final copper and molybdenum prices are set based on a specified future quotational period and the market metal price in that period. Typically, the quotational periods for copper are either one or four months after the date of arrival at the port of discharge and for molybdenum is one month after the month of shipment. Revenues are recorded under these contracts at the time title passes to the buyer and are based on the forward price for the expected settlement period. The contracts, in general, provide for a provisional payment based upon provisional assays and quoted metal prices. Final settlement is based on the average applicable price for a specified future period, and generally occurs from one to five months after shipment.

1.2.1 Gibraltar Mine

Taseko's 100% owned Gibraltar mine is located north of the City of Williams Lake in south-central British Columbia.

Gibraltar Mine Current Production and Cost Performance

In July of 2008, recognizing the effect that the tightening credit market could have on Taseko's business plan, management focused on reducing operating costs and reviewing capital projects. As the crisis deepened during the summer and fall of 2008 coupled with the dramatic drop in metal prices in September, management's actions became entirely focused on cash preservation, which entailed stopping or deferring all major projects at Gibraltar that were not needed for immediate production requirements. The timing of the pull back on projects allowed the operations management team to fully realize the benefits of the Phase 1 mill expansion and the newly commissioned mining equipment. These two factors have allowed Gibraltar to significantly reduce operating costs in a relatively short period of time. Also allowing substantial operating cost improvements were the successful implementation of the two-year mine plan along with the cumulative effects of new technology, increased recoveries and throughput, reduced strip ratio and operation of only the most cost effective mining equipment. As well, reduced cost of consumables and purchased services such as steel, fuel and ocean freight, in conjunction with the effect of the weakened Canadian Dollar against the US Dollar, have all supported the significant drop in operating cost.

**FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008
MANAGEMENT'S DISCUSSION AND ANALYSIS**

The following table illustrates detail of Gibraltar's performance during the last quarter of 2008 plus January and February 2009:

	October 2008 ³	November 2008 ³	December 2008 ³	January 2009 ³	February 2009 ³
Total tons mined (millions) ¹	3.9	2.4	2.3	2.5	2.2
Tons of ore milled (millions)	1.2	0.9	1.0	1.1	1.1
Stripping ratio	2.7	1.6	1.0	1.2	0.9
Copper grade (%)	0.372	0.317	0.404	0.350	0.352
Molybdenum grade (%Mo)	0.010	0.009	0.011	0.009	0.009
Copper recovery (%)	73.2	75.1	80.7	81.6	82.2
Molybdenum recovery (%)	20.6	33.6	31.4	39.1	30.1
Copper production (millions lb) ²	6.9	5.0	6.9	6.4	6.2
Molybdenum production (thousands lb)	52	57	71	75	57
Foreign Exchange (\$C/\$US)	1.18	1.22	1.23	1.23	1.25
Copper production costs per pound of copper	US\$1.44	US\$1.57	US\$1.24	US\$1.09	US\$1.03
By-product credit ⁴ per pound of copper	US\$0.09	US\$0.09	US\$0.09	US\$0.12	US\$0.12
Copper production costs, net of by-product credits ⁴ , per lb of copper	US\$1.35	US\$1.48	US\$1.15	US\$0.97	US\$0.91
Off property costs for transport, treatment (smelting & refining) & sales ⁵ per lb of copper	US\$0.29	US\$0.27	US\$0.27	US\$0.22	US\$0.22
Total cash costs of production per lb of copper	US\$1.64	US\$1.76	US\$1.42	US\$1.19	US\$1.13

¹ Total tons mined includes sulphide ore, oxide ore, low grade stockpile material, overburden, and waste rock which were moved from within pit limit to outside pit limit during the period.

² Copper production includes concentrate and cathode.

³ The results presented on a monthly basis are unaudited.

⁴ By-product credit is calculated on a three month total and averaged over the quarter.

⁵ Off property costs are calculated on a three month total and averaged over the quarter.

Three-Month Sales and Inventory

Copper

- Copper in concentrate sales volume increased by 49% to 17.6 million pounds in the three months ending December 31, 2008 from the 11.8 million pounds of copper in concentrate sold during the three months ending December 31, 2007.
- Copper cathode sales volume doubled in the three months ending December 31, 2008 to 0.90 million pounds compared to 0.44 million pounds in the three months ending December 31, 2007.
- Copper concentrate inventory at December 31, 2008 was 4.1 million pounds. Copper in concentrate in inventory at December 31, 2007 was 6.3 million pounds.

**FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008
MANAGEMENT'S DISCUSSION AND ANALYSIS**

- Copper cathode inventory at December 31, 2008 was 0.4 million pounds. Copper cathode in inventory at December 31, 2007 was 0.9 million pounds.
- The average price realized for sales of copper during the period was US\$1.26 (before pricing adjustments), compared to US\$3.16 per pound (before pricing adjustments) realized in the three months ending December 31, 2007.

Revenue adjustments were incurred during the period related to shipments in prior quarters. The Quotational Period (QP) for shipments sold to Gibraltar's concentrate trader in August and September 2008 was four months after month of arrival of the shipment at the designated smelter. As a result, the close or final QP for these shipments was January and February 2009. These shipments were provisionally priced when they were shipped, but the copper price dropped dramatically in the beginning of September 2008 to a copper price at the end of December 2008 of US\$1.39 per pound. This resulted in a negative pricing adjustment of \$26.9 million.

Molybdenum

- Molybdenum in concentrate sales volume declined by 32% to 143,000 pounds from 210,000 pounds sold in the three months ending December 31, 2007.
- Molybdenum in concentrate inventory at December 31, 2008 was 77,000 pounds. Molybdenum in concentrate inventory at December 31, 2007 was 96,000 pounds.
- The average price realized for sales of molybdenum for the three months ending December 31, 2008 declined to US\$19.96 per pound, compared to US\$32.18 per pound realized in the three months ending December 31, 2007.

Three-Month Production

The following table is a summary of the operating statistics for the three months ending December 31, 2008 compared to the three months ending December 31, 2007.

	Three months ending December 31, 2008	Three months ending December 31, 2007
Total tons mined (millions) ¹	8.6	10.1
Tons of ore milled (millions)	3.2	2.3
Stripping ratio	1.7	3.2
Copper grade (%)	0.365	0.364
Molybdenum grade (%Mo)	0.010	0.012
Copper recovery (%)	76.1	79.3
Molybdenum recovery (%)	28.0	50.4
Copper production (millions lb) ²	18.8	14.4
Molybdenum production (thousands lb)	179	291

¹ Total tons mined includes sulphide ore, oxide ore, low grade stockpile material, overburden, and waste rock which were moved from within pit limit to outside pit limit during the period.

² 2008 copper production includes 17.9 M lb in concentrate and 0.9 M lb in cathode. 2007 copper production includes 13.4 M lb in concentrate and 1.0 M lb in cathode.

**FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008
MANAGEMENT'S DISCUSSION AND ANALYSIS**

Tons mined during the three months ending December 31, 2008 decreased compared to the same period ending December 31, 2007 as a result of the November implementation of the revised mine plan.

Copper in concentrate production during the three-month period ending December 31, 2008 was 17.9 million pounds, an increase from the 13.4 million pounds produced in the three-month period ending December 31, 2007. This concentrate production increase is a result of the increased throughput achieved by completion of the Phase 1 concentrator expansion. Copper and molybdenum metallurgical recoveries were low in October and November as a result of mechanical problems related to the regrind mill. This is the original regrind mill and, although it is operational again, it will be replaced in summer of 2009 as part of the completion of the Phase 2 mill expansion.

Fifteen-Month Sales and Inventory

The following table illustrates the significant changes in the average prices for copper and molybdenum on a quarter by quarter basis over the past fifteen months:

	Q1 2008	Q2 2008	Q3 2008	Q4 2008	Q5 2008
LME Copper Price Average	\$3.27	\$3.51	\$3.83	\$3.49	\$1.77
	Q1 2008	Q2 2008	Q3 2008	Q4 2008	Q5 2008
Molybdenum Oxide Price Average	\$32.50	\$33.75	\$33.50	\$33.75	\$17.75

Copper

- Copper in concentrate sales during the fifteen months ending December 31, 2008 was 73.4 million pounds, compared to sales of 53.4 million pounds in the twelve months ending September 30, 2007.
- Copper in concentrate inventory at December 31, 2008 was 4.1 million pounds compared to 4.6 million pounds at September 30, 2007.
- Copper cathode sales for the fifteen months ending December 31, 2008 was 4.5 million pounds, compared to 2.1 million pounds in the twelve months ending September 30, 2007.
- Copper cathode inventory at December 31, 2008 was 0.4 million pounds compared to 0.3 million pounds at September 30, 2007

Molybdenum

- Molybdenum in concentrate sales during the fifteen months ending December 31, 2008 was 0.8 million pounds, compared to sales volume of 0.6 million pounds in the twelve months ending September 30, 2007.
- The inventory at December 31, 2008 was 77,000 pounds compared to 18,100 pounds at September 30, 2007.

**FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008
MANAGEMENT'S DISCUSSION AND ANALYSIS**

Concentrator Expansion Project

Construction of the Phase 1 mill expansion was completed in February 2008. The ramp up to the rated processing capacity of 46,000 tons per day ("tpd") has been ongoing since completion of the construction phase with sustained periods of operation at the rated capacity becoming more frequent and of longer duration as mill operations personnel continue to refine the metallurgical performance relating to grind size at higher mill throughput rates and metal recovery. The improved performance is evidenced by the recovery increasing from 73.2% in October 2008 to 82.2% in February 2009, a 12% increase.

The Phase 2 expansion program consists of modernizing and increasing the capacity of the regrind, cleaner flotation, and ancillary circuits along with installation of a two-stage tailings pumping system. Phase 2 is designed to increase concentrator capacity from 46,000 to 55,000 tpd. The construction schedule for Phase 2 has been modified as a result of management's review of capital spending. The regrind mill and cleaner flotation circuits will be completed in the summer of 2009 as they are not cash intensive to complete and they provide very robust payback through increased copper and molybdenum recoveries. Ramp up to 55,000 tpd will occur following completion of the rest of the Phase 2 program and completion of the in-pit crusher and conveyor.

The Phase 3 expansion was designed to increase throughput capacity by a further 30,000 tpd to 85,000 tpd. The engineering for Phase 3 was well advanced and the estimated capital cost had been confirmed at \$300 million for mill infrastructure and \$50 million for mining equipment. With the exception of upgrading or replacing the molybdenum circuit, the entire project has been deferred as a result of the credit market conditions and copper market outlook. Once the economic conditions improve, the decision to move forward on this next phase of expansion will be reviewed.

Labour and Safety

Labour at site was reduced as a result of the 24-month plan to reduce costs in response to significant decreases in metal prices. The number of active personnel at the end of December 2008 was 397 and at the end of February 2009 was 320, compared to 450 personnel at the site at the end of September 2008.

There was one lost time accident during the three-month period ending December 31, 2008.

**FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008
MANAGEMENT'S DISCUSSION AND ANALYSIS**

Mineral Resources and Reserves

Taseko completed a drill program and engineering study on the Oakmont ground of the Gibraltar property in 2008. These programs have confirmed an extension of the Gibraltar mineral deposit (Gibraltar Extension) and increased the mine's mineral reserves by 28% to 472 million tons.

Gibraltar's proven and probable reserves as of December 31, 2008 are tabulated below:

Gibraltar Mine Mineral Reserves At 0.20% copper cut-off				
Pit	Category	Tons (millions)	Cu (%)	Mo (%)
Connector	Proven	40.4	0.296	0.010
	Probable	14.8	0.271	0.009
	Subtotal	55.2	0.289	0.010
Gibraltar East	Proven	66.8	0.286	0.008
	Probable	33.3	0.285	0.013
	Subtotal	100.1	0.286	0.010
Granite	Proven	187.0	0.324	0.009
	Probable	25.8	0.319	0.009
	Subtotal	212.8	0.323	0.009
Gibraltar Extension (new reserves)	Proven	75.4	0.352	0.002
	Probable	29.3	0.304	0.002
	Subtotal	104.7	0.339	0.002
Total		472.8	0.315	0.008

The mineral reserves stated above are contained within the following mineral resources:

Gibraltar Mine Mineral Resources At 0.20% copper cut-off			
Category	Tons (millions)	Cu (%)	Mo (%)
Measured	598.0	0.302	0.008
Indicated	361.1	0.290	0.008
Total	959.1	0.298	0.008

The mineral resource and reserve estimations were completed by Gibraltar mine staff under the supervision of Scott Jones, P.Eng., Vice-President, Engineering and a Qualified Person under National Instrument 43-101. Mr. Jones has verified the methods used to determine grade and tonnage in the geological model, reviewed the long range mine plan, and directed the updated economic evaluation. The estimates for the Gibraltar Extension used long-term metal prices of US\$1.75 per pound for copper and US\$10.00 per pound for molybdenum and a foreign exchange of C\$0.82 per US dollar while the estimates for the balance of the reserves used long-term metal prices of US\$1.50 per pound for copper and US\$10.00 per pound for molybdenum and a foreign exchange of C\$0.80 per US dollar. A technical report has been filed on www.sedar.com.

**FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008
MANAGEMENT'S DISCUSSION AND ANALYSIS**

1.2.2 Prosperity Project

Taseko holds a 100% interest in the Prosperity property, located 125 kilometers southwest of the City of Williams Lake. The property hosts a large porphyry gold-copper deposit amenable to open pit mining. In September 2007, the Company announced the positive results of a feasibility study for the Project.

During 2008 detailed engineering was performed in order to reduce capital and operating costs thereby counteracting the impact of the then rapidly escalating costs being experienced in projects worldwide. Engineering included a redesign of the plant site layout, concentrator, maintenance shop, primary crusher, camp/administration complex, miscellaneous infrastructure, and pit development. The revised designs improve energy and operations efficiency to minimize operating costs. Worldwide pressure on costs and availability of infrastructure and equipment has softened substantially since the economic decline at the end of 2008 and the effects of these factors on the project are being evaluated.

The Ministry of Environment of British Columbia accepted Taseko's Environmental Assessment report as complete on March 13, 2009 and is moving forward under provisions of the Environmental Assessment Act with an Environmental Assessment Office ("EAO")-led review of this Project. The Canadian Environmental Assessment Agency ("CEAA") and the B.C. EAO are collaborating on their respective federal and provincial environmental assessment processes in a coordinated manner. The EA review is mandated by law to be completed 180 calendar days after the acceptance date noted above. Federal and provincial government decisions on proceeding with the Project will be made following completion of the Environmental Assessment process.

1.2.3 Harmony Project

Taseko holds 100% of the Harmony gold project, located on the Queen Charlotte-Haida Gwaii on the northwest coast of British Columbia. The Company has undertaken property maintenance and environmental monitoring activities at Harmony since acquiring the project in 2001.

The Company initiated a review of engineering work on the project in late 2007 following the designation of the area as a mineral development zone under the Queen Charlotte-Haida Gwaii Land and Resource Management Plan. Plans to move forward with the Harmony Project are currently on hold.

1.2.4 Aley Project

Taseko holds 100% of the Aley niobium project in northern British Columbia. Niobium is a metal used in making high-strength steels required in the manufacture of automobiles, bridges, pipes, jet turbines and other high technology applications. Plans to move forward with the Aley Project are currently on hold.

1.2.5 Corporate

Peter Mitchell was appointed the Company's Chief Financial Officer on September 15, 2008. Mr. Mitchell is a Chartered Accountant with degrees in Economics (BA) and Business Administration (MBA). He has extensive experience with private equity portfolio companies through acquisitions, integrations and greenfield initiatives and financing activities.

**FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008
MANAGEMENT'S DISCUSSION AND ANALYSIS**

Convertible Debenture – NVI Mining Ltd (formerly Boliden Westmin (Canada) Limited) ("NVI")

On July 21, 1999, in connection with the acquisition of the Gibraltar mine, the Company issued a \$17,000 interest-free debenture (the "Debenture") to NVI Mining Ltd. ("NVI" or formerly Boliden Westmin (Canada) Limited). The Debenture was due on July 21, 2009 and was convertible into common shares of the Company over a 10-year period commencing at a price of \$3.14 per share in year one and escalating by \$0.25 per share per year thereafter. NVI had the right to convert, in part or in whole from time to time, the Debenture into fully paid common shares of the Company from year one to year ten.

On April 2, 2008, NVI issued a notice to the Company to convert the principal amount of the Debenture of \$17,000,000 at an effective conversion rate of \$5.14 per common share, which would have resulted in 3,307,393 common shares of the Company being issued to NVI. The Company issued 2,612,971 to NVI and a cash payment of \$3,569,000 in lieu of issuing the remaining 694,422 common shares as full and final settlement to NVI.

1.2.6 Market Trends

Copper prices had been on an overall upward trend between late 2003 and October 2008, but have decreased significantly since then as a result of uncertainty in global financial markets. In mid-2008, the copper market deficit, caused by strong demand growth and struggling production and a lack of new development projects, reached its peak.

The average price in 2008 was US\$3.15/lb, compared to an average price of US\$3.22/lb in 2007. In July, the copper price was as high as US\$4.08/lb before the global credit crisis occurred, resulting in a global economic downturn and a subsequent collapse in the price of copper. In December, the price of copper retreated to a low of US\$1.26/lb. The 70% drop in price over such a short period of time was unprecedented.

Prices stabilized in January 2009, ranging from US\$1.40/lb to US\$1.50/lb and averaging US\$1.48/lb. By mid-March copper was trading in the US\$1.65/lb range. The average copper price in 2009 to mid March was US\$1.53/lb.

Precious metals prices had been on an overall uptrend for more than three years. Gold prices were volatile in late 2008, dropping below \$800/oz for a two-week period in September, and again from mid October through November. The average gold price for the year was US\$871/oz. Prices in 2009 to mid March have averaged US\$905/oz. As global economic and other market conditions are uncertain, market experts have forecast strong gold prices through 2009.

Molybdenum prices increased from US\$7.60/lb in 2003 and peaked in 2005 at an average price of US\$34/lb. Prices decreased in 2006, averaging US\$25.53/lb over the year, and strengthened again in 2007, averaging US\$30.47/lb for the year. Molybdenum prices dropped significantly in late 2008, but averaged US\$28.98/lb based on strength earlier in the year. Prices continued to drop in 2009, averaging US\$9.30/lb in January but have stabilized around that price since that time. The average price in 2009 to mid March is US\$9.68/lb.

**FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008
MANAGEMENT'S DISCUSSION AND ANALYSIS**

The Company sells its products in United States dollars but its expenses are denominated primarily in Canadian dollars. The twelve-month average at December 31, 2008 for one United States dollar was 1.067 Canadian dollars. During the first nine months of 2008, the Canadian dollar was approximately at par with the United States dollar. However, in the last three months of 2008, the Canadian dollar has weakened significantly relative to the US dollar. At December 31, 2008, one United States dollar was equivalent to 1.218 Canadian dollars. Current forecasts anticipate an average of one United States dollar to 1.246 Canadian dollars in 2009.

**FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008
MANAGEMENT'S DISCUSSION AND ANALYSIS**

1.5 Results of Operations

In October 2008, the Company announced that it would change its year end from September 30 to December 31. As a result, in accordance with National Instrument 51-102CP, “*Continuous Disclosure Obligations*”, this management discussion and analysis deals with the transition period, comparing the three months ending December 31, 2008 with the three months ending December 31, 2007 and the fifteen month ending December 31, 2008 with the twelve months ending September 30, 2007.

Three months ended December 31, 2008 versus three months ended December 31, 2007

For the three months ended December 31, 2008, Taseko generated operating loss before quotational period and inventory adjustments of \$17 million compared to an operating gain before quotational adjustment of \$18 million during the three months ended December 31, 2007. A \$21.9 million negative pricing adjustment and a \$1.5 million negative inventory adjustment was recorded in the three months ended December 31, 2008 related to the rapid deterioration in base metal prices, including copper and molybdenum. The result of these adjustments and other expenses was a net loss after tax of \$39.6 million for three months ended December 31, 2008 as compared to net earnings after tax of \$16.3 million for the three months ended December 31, 2007.

The Company recognized revenues of \$10.6 million in the three months ended December 31, 2008 (“Q5 2008”), compared to \$57.6 million in the three months ended September 30, 2008 (“Q4 2008”) and \$44.9 million in the three months ended December 31, 2007 (“Q1 2008”).

The Company is subject to pricing adjustments in its sales contracts. In a declining price environment, negative pricing adjustment will reduce the revenues realized from products shipped. Likewise, in a rising pricing environment, sales will be impacted by positive pricing adjustments. As the price of copper decreased to an average of US\$1.39 per pound by the end of December, the Company realized a negative pricing adjustment on its previous concentrate sales. The negative pricing adjustment in Q5 2008 was \$21.9 million compared with a negative adjustment of \$12.5 million for Q4 2008 and a positive adjustment of \$1.2 million for Q1 2008. A significant portion of the negative pricing adjustments in the three months ended December 31, 2008 was generated from the August and September 2008 shipments. These shipments were provisionally priced at \$3.17 per pound when they were shipped. The quotational periods declared for these shipments were January and February 2009 respectively when the copper price dropped to \$1.46 per pound in January and \$1.50 per pound in February. Consequently, an adjustment was made to revenues to adjust to the forward price of copper available, resulting in a realized price of US\$0.39/lb. Without these adjustments, the revenue per pound of copper sold during the three months ended December 31, 2008 was US\$1.26 per pound. The comparative realized average price per pound of copper sold was US\$2.99 per pound in Q4 2008 and \$3.26 in the Q1 2008.

Due to these negative pricing adjustments and the decline in prices for copper sold during the period, revenues in the quarter consisted of copper concentrate sales of \$7.6 million compared to \$51.5 million for Q4 2008 and \$36.6 million for Q1 2008. Molybdenum concentrate sales were \$1.2 million in the quarter compared to \$2.7 million for Q4 2008 and \$6.7 million for Q1 2008. Silver concentrate sales were \$0.5 million for the quarter compared to \$0.3 million for Q4 2008 and \$0.2 million for Q1 2008 and

**FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008
MANAGEMENT'S DISCUSSION AND ANALYSIS**

copper cathode sales were \$1.3 million for the quarter compared to \$3.1 million for Q4 2008 and \$1.3 million Q1 2008.

Cost of production for the quarter was \$42.0 million, compared to \$40.9 million in Q4 2008, and \$19.8 million in Q1 2008. Cost of production consists of total production cost for the period of \$30.9 million (Q4 2008 – \$40.6 million; Q1 2008 – \$19.7 million); plus concentrate inventory addition of \$11.1 million (Q4 2008 – inventory adjustment of \$0.3 million; Q1 2008 – negative inventory adjustment of \$1.7 million). Transportation and treatment costs for the quarter amounted to \$7.0 million (Q4 2008 – \$9.5 million; Q1 2008 – \$5.2 million).

Amortization expense of \$2.0 million for the current quarter was comparable to Q4 2008 of \$2.0 million and higher than Q1 2008 of \$0.7 million. The increase in amortization was the result of capital equipment additions as well as the utilization of several new pieces of equipment related to the concentrator expansion. The Company is also currently amortizing deferred stripping costs which had been capitalized in prior periods. Mining and milling assets are amortized using the units of production method based on tons mined and milled during the period and divided by the estimated tonnage to be mined and milled in the mine plan.

Exploration expenses for the quarter were \$1.1 million, compared to \$3.3 million in Q4 2008, and \$2.1 million in Q1 2008 due to a lower level of activity relating to the Company's exploration projects during the quarter.

General and administrative ("G&A") expense for the quarter was \$2.2 million, compared to \$2.1 million in Q4 2008, and \$2.0 million in Q1 2008, which has been relatively constant throughout the periods.

Stock-based compensation expense for the quarter was \$1.1 million, compared to a credit of \$0.8 million in Q4 2008, and \$2.8 million of expense in Q1 2008. The expense was the result of immediately recognizing the stock based compensation for unvested stock options which were cancelled during the quarter as well as newly granted options.

Interest and other income for the quarter was \$1.3 million, compared to \$1.6 million in Q4 2008, and \$2.5 million in Q1 2008. Interest expense and accretion for the quarter was \$3.8 million, compared to \$1.6 million in Q4 2008 and \$1.9 million in Q1 2008. The increase is due to interest component of capital lease obligations, the use of the Company's overdraft facility during the period and interest related to certain tax provisions on the Company's balance sheet.

The Company recorded a foreign exchange loss for the quarter of \$3.2 million, compared to a loss of \$1.1 million in Q4 2008, and a loss of \$0.04 million in Q1 2008. As the Company reports in Canadian dollars, the loss is due to the strengthening of the U.S. dollar and the revaluation of certain US-dollar denominated liabilities at December 31, 2008.

The Company recorded a gain resulting from the change in estimate of reclamation obligation as a result of an extension of mine life during the quarter in the amount of \$4.5 million, compared to \$nil in Q4 2008, and \$2.4 million in Q1 2008.

**FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008
MANAGEMENT'S DISCUSSION AND ANALYSIS**

Fifteen months ended December 31, 2008 ("fiscal 2008") versus twelve months ended September 30, 2007 ("fiscal 2007")

For the fifteen months ended December 31, 2008, Taseko generated operating profit before quotational period and inventory adjustments of \$56.5 million compared to \$103.4 million during the twelve months ended September 30, 2007. Additionally, during the fifteen-month period, Taseko generated cash from operating activities of \$46.9 million as compared to \$86.0 million for the twelve month period ended September 30, 2007.

A \$26.9 million negative pricing adjustment and a \$1.5 million negative inventory adjustment was recorded in the fifteen months ended December 31, 2008 related to the rapid deterioration in base metal prices, including copper and molybdenum in the quarter ended December 31, 2008. The result of these adjustments and other expenses was net earnings after tax of \$3.5 million for the fifteen months ended December 31, 2008 as compared to net earnings after tax of \$48.2 million for the year ended September 30, 2007.

The Company recognized revenues of \$231.7 million in fiscal 2008, compared to \$218.4 million in fiscal 2007. Revenues consisted of copper concentrate sales of \$194.6 million (2007 – \$191.1 million), molybdenum concentrate sales of \$21.9 million (2007 – \$18.6 million), silver concentrate sales of \$1.6 million (2007 – \$1.4 million), and copper cathode sales of \$13.6 million (2007 – \$7.4 million). The increase in revenue was the result of higher copper shipments in fiscal 2008. However, this increase was offset by lower realized prices on copper sold. For fiscal 2008, 77.9 million pounds of copper (concentrate and cathode) were sold compared to 55.5 million pounds of copper (concentrate and cathode) for fiscal 2007. The average price per pound of copper sold decreased to US\$2.68 per pound for fiscal 2008, down from US\$3.27 per pound for fiscal 2007 as a result of a drop in copper demand in the fifth quarter. Molybdenum sales were also higher in fiscal 2008 due to higher volume of sales and concentrate shipped. Molybdenum shipments increased to 0.8 million pounds for fiscal 2008 from 0.6 million pounds for fiscal 2007. However, a decline in the price of molybdenum in the last half of 2008 decreased the average price of molybdenum realized to US\$28.19 per pound for fiscal 2008, down from US\$28.26 per pound for fiscal 2007.

Under the Company's concentrate sales contracts, final copper and molybdenum prices are set based on a specified future quotational period and the market metal price in that period. Typically, the quotational periods for copper are either one or four months after the date of arrival at the port of discharge and for molybdenum is one month after the month of shipment. Revenues are recorded under these contracts at the time title passes to the buyer and are based on the forward price for the expected settlement period. Final settlement is based on the average applicable price for a specified future period, and generally occurs from one to five months after shipment. Should prices decrease between the time of shipment and final settlement, a negative pricing adjustment is recorded. As a result of the overall decrease in copper and molybdenum prices from September to December 2008, the Company had negative pricing adjustments of \$27.0 million in fiscal 2008 compared with \$2.3 million of positive pricing adjustments in fiscal 2007. A significant portion of the negative pricing adjustments in fiscal 2008 was generated from the August and September 2008 shipments. These shipments were provisionally priced at \$3.17 per pound when they were shipped. The quotational periods declared for these shipments were January and February 2009 respectively when the copper price dropped to \$1.46 per pound in January and \$1.50 per pound in February 2009.

**FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008
MANAGEMENT'S DISCUSSION AND ANALYSIS**

Cost of sales for fiscal 2008 was \$196.2 million, compared to \$109.5 million for fiscal 2007. Cost of sales for fiscal 2008 consists of total production cost of \$158.8 million (2007 – \$79.0 million) and a concentrate inventory adjustment of \$2.4 million (2007 – \$9.2 million). Also included in cost of sales is transportation and treatment costs, which were \$35 million for fiscal 2008 (2007 – \$21.3 million). Cost of sales was higher during fiscal 2008 mainly due to higher production volumes, increases in fuel and ocean freight charges and the expense of stripping costs which were capitalized in the prior year. In addition, lost mill production time from the electrical transformer failure in May 2008 also contributed to higher production costs.

Amortization expense for fiscal 2008 was \$7.4 million compared to \$3.2 million in fiscal 2007. The increase is the result of capital equipment additions as well as the utilization of several new pieces of equipment related to the concentrator expansion. The Company is also currently amortizing deferred stripping costs which had been capitalized in prior periods. Mining and milling assets are amortized using the units of production method based on tons mined and tons milled during the period and divided by the estimated tonnage to be mined and milled in the mine plan.

Exploration expenses increased to \$11.9 million in fiscal 2008 compared to \$9.0 million in fiscal 2007, due to a higher level of activity relating to the Company's Prosperity project and work performed on the environmental assessment review (see Section 1.2.2). Exploration expenses of \$6.2 million (fiscal 2007 – \$7.4 million) at Gibraltar were capitalized as the exploration expenditures resulted in the discovery of additional mineral reserves that will allow for increases in future production at the Gibraltar mine.

General and administrative ("G&A") costs increased to \$11.0 million in fiscal 2008 from \$6.5 million in fiscal 2007, mainly due to an extended reporting period of fifteen months in 2008 compared to twelve months in 2007. The increase in G&A was also due to higher salaries and benefits (2008 – \$7.3 million, 2007 – \$3.5 million) resulting from more staff required to support the Company's exploration projects, expansion at Gibraltar and general corporate activities. Other G&A costs include conference and travel (2008 – \$1.0 million; 2007 – \$0.5 million); consulting (2008 – \$0.3 million; 2007 – \$0.6 million); shareholder communication (2008 – \$0.6 million; 2007 – \$0.5 million) legal and accounting (2008 – \$1.5 million; 2007 – \$1.2 million); trust and filing (2008 – \$0.3 million; 2007 – \$0.2 million).

Stock-based compensation was \$6.4 million in fiscal 2008 compared to \$6.8 million in fiscal 2007. Most of the stock-based compensation in fiscal 2008 resulted from immediately recognizing the stock-based compensation for unvested stock options which were cancelled during the period as well as newly granted options.

Interest and other income decreased to \$9.7 million as compared to \$11.1 million in fiscal 2007. The decrease was due to a lower average cash balance in fiscal 2008. Interest expense and interest accretion increased to \$11.2 million in fiscal 2008 compared to \$8.9 million in fiscal 2007 mainly due to an extended reporting period of fifteen months in 2008 compared to twelve months in 2007. In addition, the Company entered into capital lease obligations as well as used its overdraft facility during the period and interest incurred related to certain tax provisions on the Company's balance sheet. The Company recorded a foreign exchange loss of \$4.0 million for fiscal 2008 compared to a gain of \$0.2 million in fiscal 2007. The loss is due to the strengthening of the U.S. dollar and the revaluation of certain US-dollar denominated liabilities at December 31, 2008.

FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008 MANAGEMENT'S DISCUSSION AND ANALYSIS

The Company recorded a gain resulting from the change in estimate of reclamation obligation as a result of an extension mine life in fiscal 2008 of \$6.9 million, compared to a similar gain of \$4.6 million for fiscal 2007.

Current income tax recovery of \$2.2 million (2007 – expense of \$4 million) and future income taxes recovery of \$3.4 million (2007 – expense of \$35.6 million) were recorded for the fifteen months ended December 31, 2006. The decrease in taxes is due mainly to a reduction in profitability as a result of the economic downturn and the use of available tax pools to offset taxable income.

The Company also has a long term tax liability provision of \$30.7 million (2007 – \$24.6 million) recorded on the Company's balance sheet recorded in fiscal 2008 in accordance with Canadian generally accepted accounting principles.

1.6 Liquidity

At December 31, 2008, the Company had cash and equivalents of \$4.6 million, as compared to \$37.6 million at September 30, 2007. At February 28, 2009, the Company's cash and equivalents has increased to \$32.8 million.

Management anticipates that sales from copper and molybdenum concentrate and copper cathode, along with the US\$30 million term facility and \$25 million equity financing announced on March 26, 2009 as disclosed in Section 1.7 *Capital Resources*, the new 24-month mine plan and implemented cash management strategies will be sufficient to fund current operations and satisfy obligations as they come due. Management is actively monitoring all commitments and planned expenditures necessary to maintain operational objectives for the upcoming fiscal year.

A new 24-month mining plan was implemented in November 2008 for the Gibraltar mine, which includes a significantly reduced strip ratio and lower equipment hours and manpower requirements. This plan, along with declining input costs, a weaker Canadian dollar and the completion of the remaining Phase 2 expansion items will reduce operating costs and ensure there is sufficient liquidity and working capital to manage the current economic downturn.

Liquidity Risk

The Company ensures that there is sufficient capital in order to meet short term business requirements, after taking into account cash flows from operations and the Company's holdings of cash and equivalents. The Company believes that these sources will be sufficient to cover the likely short and long term cash requirements. The Company's cash and equivalents are invested in business accounts bankers acceptances, which are available on demand for the Company's programs.

**FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008
MANAGEMENT'S DISCUSSION AND ANALYSIS**

The following are the contractual maturities of contractual obligations (in thousands of Canadian dollars):

2008	Carrying amount	2009	2010	2011	Over 3 years
Accounts payable and accrued liabilities	\$ 27,468	\$ 27,468	\$ –	\$ –	\$ –
Accrued quotational payments	25,568	25,568			
Bank overdraft facility (repaid in Feb 2009)	5,737	5,737			
Amounts due to related parties	1,772	1,772	–	–	–
Capital lease obligation	18,900	4,280	4,003	4,003	6,614
Convertible debt	35,219	–	–	35,219	–
Royalty obligation	64,357	3,384	4,804	5,862	50,307
Total contractual obligations	\$ 179,021	\$ 68,209	\$ 8,807	\$ 45,084	\$ 56,921

The Company also has purchase orders in the normal course of operations for capital equipment required for the Gibraltar expansion project in the amount of \$17,375,000. The orders have specific delivery dates and financing of this equipment will be through existing cash resources.

Other than those obligations disclosed in the notes to its audited annual financial statements for the fiscal period ended December 31, 2008, the Company had no other material commitments for material capital expenditures as of December 31, 2008.

Although the Company has implemented the necessary plans to ensure sufficient financial liquidity, the Company's ability to repay or refinance its financial liabilities to their contractual maturities depends on a number of factors, some of which are beyond the Company's control. There is no assurance that our expected cash flows from operations in combination with other steps being taken will allow us to meet these obligations as they become due.

1.7 Capital Resources

The Company's primary sources of liquidity and capital resources are our cash flow provided from operations as well as equity and debt financings.

Equity Financings – Private Placements

On October 30, 2007, the Company closed a "bought deal" short form prospectus offering of 7,115,385 common shares at a price of \$5.20 per common share. The Company granted to the underwriters an over-allotment option to purchase up to an additional 1,067,307 common shares at \$5.20. The underwriters elected to exercise the over-allotment option in full at the closing, resulting in aggregate gross proceeds to the Company of \$42.5 million.

On November 13, 2007, the Company completed a private placement financing by issuing 1,455,100 common shares at a price of \$5.20 per share for gross proceeds of \$7.6 million.

**FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008
MANAGEMENT'S DISCUSSION AND ANALYSIS**

On December 17, 2008, the Company completed a private placement financing of 8,571,429 units (the "Units"), which each Unit consisting of one common share and one common share purchase warrant (a "Warrant"), at the issue price of \$0.70 per Unit (the "Purchase Price)" for gross proceeds of \$6 million. Each Warrant entitles the holder to purchase one common share of the Company for a period of 24 months at the exercise price of \$0.85 per Warrant Share in the first 12 months and \$0.95 per Warrant Share in the second 12 months.

On March 26, 2009, the Company announced it had entered into an agreement with a syndicate of underwriters under which the underwriters have agreed to buy from Taseko 13,793,104 common shares at an issue price of \$1.45 per common share (the "Offering") for gross proceeds of approximately \$20 million. The underwriters will have an over-allotment option, exercisable at any time prior to 30 days after the closing date, to acquire up to an additional number of common shares equal to 15% of the number of common shares sold pursuant to the Offering, at the issue price. The Company also announced it intends to issue, via a non-brokered private placement at the same price as the Offering, approximately CDN\$5 million of common shares (the "Non-Brokered Offering"). Finder's fees will be payable on the Non-Brokered Offering. The net proceeds from the Offering and the Non-Brokered Offering are intended to be used for general working capital and corporate purposes.

Debt Financings

During the 2008 fiscal period, the Company signed an overdraft facility with a Canadian financial institution for up to \$10 million. As at December 31, 2008, the Company had drawn \$5.7 from the overdraft facility. The term of the facility bore interest at prime rate plus 1% and was secured against the Company's accounts receivable. The facility agreement stipulated that the facility will be terminated in the event the London Metal Exchange ("LME") monthly cash price of copper reduces below US\$2.00. The facility was also subject to minimum working capital, interest and debt-to-equity ratio covenants. Subsequent to year-end, due to the decrease in copper prices below US\$2.00, the Company repaid the facility in full.

In February 2009, the Company entered into a US\$30 million 36-month term facility agreement (the "Facility") with Credit Suisse repayable commencing 14 months after the first utilization of the "Facility". The loan bears interest at LIBOR plus 4 percent. Pursuant to security agreements entered into in connection with the Facility, the Company has ceded as security, certain equipment of the Gibraltar Mine and the MRI treatment and refining agreement.

Other Sources

The Company acquired certain mining equipment during the year in the amount of \$17.6 million pursuant to three to four year capital lease agreements. These capital lease obligations are secured by the mining equipment and are repayable in monthly installments. Interest is charged at rates linked to the prevailing prime rate.

The Company was permitted by the Government of British Columbia to release \$5 million from the Gibraltar mine reclamation deposit in exchange for security on certain equipment of the Gibraltar mine. Subsequent to period end, the Company obtained further approval and release \$3.9 million from the reclamation deposit.

**FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008
MANAGEMENT'S DISCUSSION AND ANALYSIS**

Other than those obligations disclosed in the notes to its audited annual financial statements for the fiscal period ended December 31, 2008, the Company has no other long term debt, capital lease obligations, operating leases or any other long term obligations as of December 31, 2008.

1.8 Off-Balance Sheet Arrangements

None.

1.9 Transactions with Related Parties

Hunter Dickinson Services Inc. ("HDSI") (formerly Hunter Dickinson Inc.) is a private company owned equally by several public companies, one of which is Taseko. HDSI has certain directors in common with the Company and carries out geological, engineering, corporate development, administrative, financial management, investor relations, and other management activities for, and incurs third party costs on behalf of, the Company. The Company reimburses HDSI on a full cost-recovery basis per agreement dated June 1, 2008.

Costs for services rendered and costs incurred on behalf of the Company by HDSI during the fiscal period ended December 31, 2008 were \$8.9 million, as compared to \$4.9 million in the year of 2007. The increase over prior fiscal year is due to higher staffing levels required to support the increase in general corporate development and exploration activities.

1.10 Current Quarter

Please refer to section *1.5 Results of Operations*.

1.11 Proposed Transactions

None.

1.12 Critical Accounting Estimates

The Company's significant accounting policies are presented in notes 3 and 4 of the audited consolidated statements for the fiscal period ended December 31, 2008. The preparation of consolidated financial statements in accordance with generally accepted accounting principles requires management to select accounting policies and make estimates. Such estimates may have a significant impact on the consolidated financial statements. These estimates include:

- mineral resources and reserves,
- the carrying values of concentrate inventories and supplies inventories
- the carrying values of mineral properties,
- the carrying values of property, plant and equipment,
- rates of amortization of property, plant and equipment
- the carrying values of the reclamation liability,

**FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008
MANAGEMENT'S DISCUSSION AND ANALYSIS**

- the carrying values of the convertible debentures and conversion rights,
- income taxes,
- the valuation allowances for future income taxes,
- the carrying values of the receivables from sales of concentrate,
- the carrying values of deferred revenue,
- the assumptions used in determining the reclamation obligation, and
- the valuation of stock-based compensation expense.

Actual amounts could differ from the estimates used and, accordingly, affect the results of operations.

During the fifteen months fiscal period ended December 31, 2008, the Company increased its mineral reserves at the Company's Gibraltar mine, thereby extending the life of the mine. Consequently, the rates of amortization of the Company's property, plant and equipment, the carrying values of the reclamation liability, and the Company's future income taxes have been revised to reflect the extended mine life.

Mining and milling assets are amortized using the units of production method based on tons mined and milled during the period divided by the estimated tonnage to be recovered in the mine plan. An increase in recoverable reserves results in higher estimated tonnage to be recovered in the mine plan and hence a reduced annual amortization rate.

Due to the recent drop in commodity prices, the Company conducted a review of the carrying values of its mineral properties, plant, and equipment under Canadian GAAP as at December 31, 2008. The Company prepared cash flow forecasts for the Gibraltar mine and exploration projects using price assumptions reflecting prevailing commodity prices and analysts' consensus forecasts, current life-of-mine plans and forecast operating cost profiles. The long-term price assumptions used were US\$1.75 per pound of copper and US\$12 per pound of molybdenum. No impairment was identified for the Gibraltar Mine and the Company's other exploration projects.

The Company also conducted a review of its inventory and recorded an adjustment of \$1.5 million to reduce the concentrate inventory to its net realizable value at December 31, 2008.

1.13 Change in Accounting Policies including Initial Adoption

Effective October 1, 2007, the Company adopted the following new accounting standards issued by the Canadian Institute of Chartered Accountants ("CICA") relating to financial instruments. As required by the transitional provisions of these new standards, these new standards have been adopted on a prospective basis with no restatement to prior period financial statements.

(a) Accounting Changes (Section 1506)

This standard establishes criteria for changing accounting policies, together with the accounting treatment and disclosure of changes in accounting policies, changes in accounting estimates and correction of errors. As a result, changes in accounting policies are only permitted when required by a primary source of GAAP or when the change will result in more reliable and more relevant information.

**FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008
MANAGEMENT'S DISCUSSION AND ANALYSIS**

(b) Capital Disclosures (Section 1535)

This standard requires disclosure of an entity's objectives, policies and processes for managing capital, quantitative data about what the entity regards as capital and whether the entity has complied with any externally imposed capital requirements and, if it has not complied, the consequences of such non-compliance.

(c) Financial Instruments – Disclosure (Section 3862) and Presentation (Section 3863)

These standards replace CICA 3861, "*Financial Instruments – Disclosure and Presentation*". These new standards require entities to disclose quantitative and qualitative information that enable users to evaluate the significance of financial instruments on the Company's financial performance, and the nature and extent of risks arising from financial instruments to which the Company is exposed during the year and at the balance sheet date. In addition, disclosure is required of management's objectives, policies and procedures for managing these risks.

(d) Inventories (Section 3031)

This standard replaces the existing Section 3030 with the same title and will harmonize accounting for inventories under Canadian GAAP with International Financial Reporting Standards ("IFRS"). This standard requires that inventories be measured at the lower of cost and net realizable value, and includes guidance on the determination of costs, including the allocation of overheads and other costs. The standard also requires that similar inventories within a consolidated group be measured using the same method. It also requires the reversal of previous write-downs to net realizable value when there is a subsequent increase in the value of inventories. The Company adopted this standard during the current period and determined that there was no significant impact on the financial statements.

(e) Going Concern – Amendments to Section 1400

CICA Section 1400, "*General Standards of Financial Statement Presentation*", was amended to include requirements to assess and disclose an entity's ability to continue as a going concern. The Company has assessed its ability to continue as a going concern and concluded that it will be able to continue as a going concern. The Company has made the following disclosure in the notes to the financial statements:

The consolidated financial statements are prepared on the basis that the Company will continue as a going concern which contemplates the realization of assets and settlement of liabilities in the normal course of operations as they come due. As at December 31, 2008, the Company had cash and equivalents of \$4,587,000 and a working capital deficit of \$70,770,000.

Deterioration of global economic conditions during the latter part of the 2008 calendar year resulted in a significant weakening of base metal prices and high volatility in the exchange traded commodity prices. As well as affecting the commodity price received on the Company's sales, the rapid decline in copper and molybdenum prices generated significant negative provisional pricing adjustments for sales in the final quarter of 2008, resulting in an increase in accrued liabilities as the price adjustment features are treated as embedded derivatives for accounting

**FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008
MANAGEMENT'S DISCUSSION AND ANALYSIS**

purposes and are marked-to-market at each period end. The Company has US\$30 million in convertible bonds (note 14) that have a "put" right to be redeemed at 100.6% by the Bondholders in August 2009. Due to this "put" right, the bonds have been accordingly classified as current liabilities as at December 31, 2008. Subsequent to year-end, the Company secured a US\$30 million 36-month term facility agreement (note 21(b)) and announced a \$25 million "bought-deal" equity financing (note 21(c)). The Company is also committed to equipment purchases in relation to its expansion activities at the Gibraltar Mine in the amount of \$ \$17,375 (note 20 (a)).

Although the Company has had a history of operating profit, recent economic events have also impacted the profitability of the Company's operations. The Company is monitoring all expenditures and implementing appropriate cash management strategies to ensure that it has adequate cash resources to fund identified commitments. The Company has implemented a new 24-month operational mine plan which will sustain current mill throughput while mining at a reduced strip ratio, resulting in reduced operating costs. Furthermore, certain expansion projects have been deferred until improvements occur in the credit and commodity markets. While there can be no assurances that the Company's plans to address the current economic events will be successful, management believes that there is sufficient funding through our current resources, credit facilities and cash flow from operations to continue as a going concern.

If the Company is unable to maintain profitable operations and generate sufficient cash flows to meet obligations as they come due, the Company may have to reduce or curtail its operations and exploration activities or obtain financing at unfavorable terms. Furthermore, failure to continue as a going concern would require that the Company's assets and liabilities be restated on a liquidation basis which would differ significantly from the going concern basis.

New Accounting Standards Not Yet Adopted

(f) International Financial Reporting Standards ("IFRS")

The Canadian Accounting Standards Board ("AcSB") has announced its decision to replace Canadian generally accepted accounting principles ("Canadian GAAP") with International Financial Reporting Standards ("IFRS") for all Canadian publicly-listed companies. The AcSB announced that the changeover date will commence for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The transition date for the Company to changeover to IFRS will be January 1, 2011. Therefore, the IFRS adoption will require the restatement for comparative purposes of amounts reported by the Company for the year ended December 31, 2010. The Company is currently in the process of developing an IFRS conversion plan and evaluating the impact of the transition to IFRS.

**FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008
MANAGEMENT'S DISCUSSION AND ANALYSIS**

(g) Section 3064 – Goodwill and Intangibles

The AcSB issued CICA Handbook Section 3064, which replaces Section 3062, “*Goodwill and Other Intangible Assets*”, and Section 3450, “*Research and Development Costs*”. This new section establishes standards for the recognition, measurement, presentation and disclosure of goodwill subsequent to its initial recognition and of intangible assets. Standards concerning goodwill remain unchanged from the standards included in the previous Section 3062. The section applies to interim and annual financial statements relating to fiscal years beginning on or after October 1, 2008. The Company is currently evaluating the impact of this new standard and anticipates this standard will have no significant impact on the financial statements.

1.14 Financial Instruments and Other Instruments

Please refer to note 6 of the accompanying audited consolidated financial statements.

1.15 Other MD&A Requirements

Additional information relating to the Company, including the Company's Annual Information Form, is available on SEDAR at www.sedar.com.

1.15.1 Additional Disclosure for Venture Issuers without Significant Revenue

Not applicable. The Company is not a Venture Issuer.

**FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008
MANAGEMENT'S DISCUSSION AND ANALYSIS**

1.15.2 Disclosure of Outstanding Share Data

The following details the share capital structure as at March 26, 2009, the date of this MD&A. These figures may be subject to minor accounting adjustments prior to presentation in future consolidated financial statements.

	Expiry date	Exercise price	Number	Number
Common shares				153,187,116
Share purchase option	March 27, 2009	\$ 2.18	90,000	
	March 27, 2009	\$ 2.68	20,000	
	Feb 14, 2010	\$ 3.07	66,000	
	July 03, 2010	\$4.03	60,000	
	September 28, 2010	\$1.15	348,334	
	September 28, 2010	\$ 1.15	780,000	
	September 28, 2010	\$ 2.07	70,000	
	Feb 24, 2011	\$4.50	98,000

**FIFTEEN MONTH FISCAL PERIOD ENDED DECEMBER 31, 2008
MANAGEMENT'S DISCUSSION AND ANALYSIS**

1.15.3 Internal Controls over Financial Reporting Procedures

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control system was designed to provide reasonable assurance to the Company's management and the board of directors regarding the preparation and fair presentation of published financial statements. Internal control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

The Company's management, with the participation of the Chief Executive Officer and the Chief Financial Officer, has evaluated the effectiveness of internal control over financial reporting based on the framework and criteria established in Internal Control – Integrated Framework, issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, our management has concluded that internal control over financial reporting was effective as of December 31, 2008 to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with GAAP.

There have been no significant changes in internal controls over financial reporting during the fiscal period ended December 31, 2008 that could have materially affected or are reasonably likely to materially affect the Company's internal control over financial reporting.

1.15.4 Disclosure Controls and Procedures

Disclosure controls and procedures are those controls and procedures that are designed to ensure that the information required to be disclosed in the filings under applicable securities regulations is recorded, processed, summarized and reported within the time periods specified. As at December 31, 2008, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based on this evaluation, the Chief Executive Officer and the Chief Financial Officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective.

There have been no significant changes in the Company's disclosure controls and procedures during the fiscal period ended December 31, 2008 that could have materially affected or are reasonably likely to materially affect the Company's disclosure controls and procedures.

AUDITORS' REPORT

To the Shareholders of Taseko Mines Limited

We have audited the consolidated balance sheets of Taseko Mines Limited ("the Company") as at December 31, 2008 and September 30, 2007 and the consolidated statements of operations and comprehensive income (loss), shareholders' equity and cash flows for the fifteen month period ended December 31, 2008 and for the years ended September 30, 2007 and 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with Canadian generally accepted auditing standards and the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2008 and September 30, 2007 and the results of its operations and its cash flows for the fifteen month period ended December 31, 2008 and for the years ended September 30, 2007 and 2006 in accordance with Canadian generally accepted accounting principles.

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

1. CONTINUING OPERATIONS AND GOING CONCERN

Taseko Mines Limited ("Taseko" or the "Company") is a public company incorporated under the laws of the Province of British Columbia. At December 31, 2008, the Company's principal business activities related to the operations of the Gibraltar Copper Mine, and exploration on the surrounding properties as well as exploration on the Company's 100% owned Prosperity Gold-Copper Property, Harmony Gold Property and Aley Niobium Property. The Gibraltar property and the Prosperity property are located in south central British Columbia, Canada, near the city of Williams Lake. The Harmony property is located on Graham Island, Queen Charlotte Islands (also known as Haida Gwaii), British Columbia. The Aley Niobium property is located in north eastern British Columbia, near the city of Mackenzie.

The consolidated financial statements are prepared on the basis that the Company will continue as a going concern which contemplates the realization of assets and settlement of liabilities in the normal course of operations as they come due. As at December 31, 2008, the Company had cash and equivalents of \$4,587 and a working capital deficit of \$70,770.

Deterioration of global economic conditions during the latter part of the 2008 calendar year resulted in a significant weakening of base metal prices and high volatility in the exchange traded commodity prices. As well as affecting the commodity price received on the Company's sales, the rapid decline in copper and molybdenum prices generated significant negative provisional pricing adjustments for sales in the final quarter of 2008, resulting in an increase in accrued liabilities as the price adjustment features are treated as embedded derivatives for accounting purposes and are marked-to-market at each period end. The Company has US\$30,000 in convertible bonds (note 14) that have a "put" right to be redeemed at 100.6% by the Bondholders in August 2009. Due to this "put" right, the bonds have been accordingly classified as current liabilities as at December 31, 2008. Subsequent to year-end, the Company secured a US\$30,000 36-month term facility agreement (note 21(b)) and announced a \$25 million "bought-deal" equity financing (note 21(c)). The Company is also committed to equipment purchases in relation to its expansion activities at the Gibraltar Mine in the amount of \$17,375 (note 20 (a)).

Although the Company has had a history of operating profit, recent economic events have also impacted the profitability of the Company's operations. The Company is monitoring all expenditures and implementing appropriate cash management strategies to ensure that it has adequate cash resources to fund identified commitments. The Company has implemented a new 24-month operational mine plan which will sustain current mill throughput while mining at a reduced strip ratio, resulting in reduced operating costs. Furthermore, certain expansion projects have been deferred until improvements occur in the credit and commodity markets. While there can be no assurances that the Company's plans to address the current economic events will be successful, management believes that there is sufficient funding through our current resources, credit facilities and cash flow from operations to continue as a going concern.

If the Company is unable to maintain profitable operations and generate sufficient cash flows to meet obligations as they come due, the Company may have to reduce or curtail its operations and exploration activities or obtain financing at unfavorable terms. Furthermore, failure to continue as a going concern would require that the Company's assets and liabilities be restated on a liquidation basis which would differ significantly from the going concern basis.

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

2. BASIS OF PRESENTATION

In September 2008, the Company's Board of Directors approved a resolution to change the Company's year end from September 30 to December 31. Accordingly, these financial statements are prepared as at December 31, 2008 and September 30, 2007 and for the fifteen months ended December 31, 2008 and the years ended September 30, 2007 and 2006.

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles. These consolidated financial statements include the accounts of the Company and all of its subsidiaries. All material intercompany accounts and transactions have been eliminated.

3. SIGNIFICANT ACCOUNTING POLICIES

(a) *Cash and equivalents*

Cash and equivalents consist of cash and highly liquid investments, having maturity dates of three months or less from the date of acquisition, that are readily convertible to known amounts of cash. At December 31, 2008, of the \$4,587 cash and equivalents held by the Company, \$2,169 (US\$1,756) were held in United States dollar denominated cash and equivalents (September 30, 2007 – \$34,717 (US\$34,898)). It excludes cash subject to restrictions under supplier guarantee arrangements (note 11).

(b) *Revenue recognition*

Revenue from the sales of metal in concentrate is recognized when persuasive evidence of a sales agreement exists, the title and risk is transferred to the customer, collection is reasonably assured, and the price is reasonably determinable. Revenue from the sales of metal may be subject to adjustment upon final settlement of shipment weights, assays and estimated metal prices. Adjustments to revenue for metal prices are recorded monthly and other adjustments are recorded on final settlement. Cash received in advance of meeting these revenue recognition criteria is recorded as deferred revenue.

Under the Company's concentrate sales contracts, final copper and molybdenum prices are set based on a specified future quotational period and the market metal price in that period. Typically, the quotational periods for copper are either one or four months after the date of arrival at the port of discharge and for molybdenum is one month after the month of shipment. Revenues are recorded under these contracts at the time title passes to the buyer and are based on the forward price for the expected settlement period. The contracts, in general, provide for a provisional payment based upon provisional assays and quoted metal prices. Final settlement is based on the average applicable price for a specified future period, and generally occurs from one to five months after shipment. The price adjustment features in the Company's receivables are treated as embedded derivatives for accounting purposes and as such, are marked-to-market through earnings from the date of sale through the date of final pricing.

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

(c) *Inventory*

Concentrate inventory consists of metal in concentrate, ore-in-process and stockpiled ore. Concentrate inventory is valued based on the lower of average production cost and net realizable value. Production costs include the cost of raw materials, direct labour, mine-site overhead expenses and depreciation.

The costs of removing waste material in the process of mining ore, referred to as "stripping costs", are considered costs of the extracted minerals and recognized as a component of concentrate inventory to be recognized in cost of sales in the same period as the revenue from the sale of the concentrate inventory.

Materials and supplies inventory is valued at the lower of average cost and net realizable value.

Copper cathode inventory consists of finished goods in the form of copper cathode sheets. Copper cathode inventory is valued at the lower of average production cost and net realizable value.

(d) *Financial Instruments*

All financial instruments, including derivatives, are included on the Company's balance sheet and measured either at fair value or, in certain circumstances when fair value may not be considered most relevant, at cost or amortized cost. Changes in fair value are recognized in the statements of operations or accumulated other comprehensive income, depending on the classification of the related instruments.

All financial assets and liabilities are recognized when the entity becomes a party to the contract creating the asset or liability. All financial instruments are classified into one of the following categories: held for trading, held-to-maturity, loans and receivables, available-for-sale financial assets, or other financial liabilities. Initial and subsequent measurement and recognition of changes in the value of financial instruments depends on their initial classification:

- Held-to-maturity investments, loans and receivables, and other financial liabilities are initially measured at fair value and subsequently measured at amortized cost. Amortization of premiums or discounts and losses due to impairment are included in current period net earnings (loss).
- Available-for-sale financial assets are measured at fair value. Changes in fair value are included in other comprehensive income (loss) until the gain or loss is recognized in net earnings (loss).
- Held for trading financial instruments are measured at fair value. All changes in fair value are included in net earnings (loss) in the period in which they arise.
- All derivative financial instruments are measured at fair value, even when they are part of a hedging relationship. Changes in fair value are included in net earnings (loss) in the period in which they arise, except for cash flow hedge transactions which qualify for hedge accounting treatment in which case gains and losses are recognized in other comprehensive income (loss).

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

In accordance with this standard, the Company had classified its financial instruments as follows:

Financial Instrument	Classification	Measurement
Cash and equivalents	Held for Trading	Fair Value
Restricted cash	Held for Trading	Fair Value
Marketable securities and investments (i)	Available for Sale	Fair Value
Amounts receivable	Loans and Receivables	Amortized cost
Advances to a related party	Loans and Receivables	Amortized cost
Reclamation deposits (ii)	Available for Sale	Fair Value
Promissory note (iii)	Loan and Receivable	Amortized cost
Bank indebtedness	Held for Trading	Fair Value
Accounts payable and accrued liabilities	Other Financial Liability	Amortized cost
Advances from a related party	Other Financial Liability	Amortized cost
Convertible debt (iv)	Other Financial Liability	Amortized cost

- i.) Marketable securities are classified as available-for-sale securities and are measured at fair market value with unrealized gains or losses recorded in comprehensive income (loss). At the time securities are sold or otherwise disposed of, gains or losses are included in net earnings (loss)
- ii.) Reclamation deposits invested in government bonds and treasury bills are classified as available-for-sale securities and are carried at fair market value, with the unrealized gain or loss recorded in shareholders' equity as a component of other comprehensive income (loss). These amounts will be reclassified from accumulated other comprehensive income (loss) to net earnings (loss) when the investment is sold.
- iii.) The Promissory note relating to the Red Mile Resources No. 2 Limited Partnership Agreement ("Red Mile") is classified as a loan and receivable.
- iv.) The debt component of the Convertible bonds and debenture are classified as other financial liability and are measured at amortized cost.
- v.) The Company's investment in a convertible promissory note of Continental Minerals Corporation ("Continental") contained an embedded derivative which was separated from the host contract and measured at fair value. Continental repaid this promissory note during fiscal 2007.

(e) *Comprehensive Income (Loss)*

Comprehensive income (loss) is the change in the Company's shareholder equity that results from transactions and other events from other than the Company's shareholders and includes items that would not normally be included in net earnings (loss), such as unrealized gains or losses on

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

available-for-sale investments. This standard requires certain gains and losses that would otherwise be recorded as part of net earnings (loss) to be presented in other “comprehensive income (loss)” until it is considered appropriate to recognize into net earnings (loss). This standard requires the presentation of comprehensive income (loss), and its components in a separate financial statement that is displayed with the same prominence as the other financial statements. Accumulated other comprehensive income (loss) is presented as a category in shareholders’ equity.

Accordingly, the Company reports a consolidated statement of operations and comprehensive income (loss) and includes the account “accumulated other comprehensive income (loss)” in the shareholders’ equity section of the consolidated balance sheet.

(f) *Plant and equipment*

Plant and equipment are stated at cost less accumulated amortization. Mining and milling assets are amortized using the units of production method based on tons mined and milled, respectively, divided by the estimated tonnage to be recovered in the mine plan. During the year, the Company extended the life of its Gibraltar mine. Consequently, the useful life over which the Company’s mining and milling assets are depreciated has been extended to reflect their additional use from an extended mine life. Amortization for all other assets is calculated using the declining balance method at rates ranging from 10% to 50% per annum. Repairs and maintenance expenditures are charged to operations as incurred. Major improvements and replacements which extend the useful life of the asset are capitalized as incurred.

The costs of removing overburden material to access mineral reserve deposits, referred to as “stripping costs”, are accounted for as variable production costs to be included in the cost of inventory produced, unless the overburden removal activity can be shown to be a betterment of the mineral property, in which case these costs are capitalized. Betterment occurs when the overburden removal activity provides access to additional sources of mineral deposit reserves that will be produced in future periods which would not have otherwise been accessible in the absence of the pre-stripping activity. These deferred costs are amortized using the units of production basis to cost of sales over the life of the mineral deposit reserves.

(g) *Mineral property interests*

The Company capitalizes mineral property acquisition costs on a property-by-property basis. Exploration expenditures and option payments incurred prior to the determination of the feasibility of mining operations are charged to operations as incurred. Exploration expenditures incurred subsequent to the mining operations which do not increase production or extend the life of operations are expensed in the period incurred.

The Company capitalizes development expenditures which have (a) a probable future benefit which the Company can obtain, (b) result from a past transaction, and (c) occur on property controlled by the Company on mineralized ore bodies that have, or are determined to have as a result of these costs, economically mineable mineral reserves. Acquisition costs and development expenditures are amortized over the estimated life of the property, or written off to operations if

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

the property is abandoned, allowed to lapse, or if there is little prospect of further work being carried out by the Company.

Mineral property acquisition costs include the cash consideration and the fair market value of common shares issued for mineral property interests pursuant to the terms of the relevant agreement. Payments relating to a property acquired under an option or joint venture agreement, where such payments are made at the sole discretion of the Company, are recorded in the accounts upon payment.

Costs related to feasibility work and the development of processing technology are expensed as incurred. Costs incurred subsequent to the determination of the feasibility of the processing technology will be capitalized and amortized over the life of the related plant.

Administrative expenditures are expensed as incurred.

The amount presented for mineral property interests represents costs incurred to date and accumulated acquisition costs, less write-downs and accumulated amortization, and does not necessarily reflect present or future values.

(h) Site closure and reclamation costs

The Company recognizes any statutory, contractual or other legal obligation related to the retirement of tangible long-lived assets when such obligations are incurred, if a reasonable estimate of fair value can be made. These obligations are measured initially at fair value and the resulting costs are capitalized to the carrying value of the related asset. In subsequent periods, the liability is adjusted for the accretion of the discount and any changes in the amount or timing of the underlying future cash flows. The asset retirement cost is amortized to operations over the life of the asset. Changes resulting from revisions to the timing or the amount of the original estimate of undiscounted cash flows are recognized as an increase or a decrease in the carrying amount of the liability, and the related asset retirement cost is capitalized as part of the carrying amount of the related long-lived asset. In the event the required decrease in the asset retirement cost is in excess of the carrying value, the excess amount is recorded as a change in estimate in the statement of operations.

(i) Impairment of long-lived assets

Long-lived assets, including mineral property interests, plant and equipment, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized by the amount by which the carrying amount of the asset exceeds the fair value of the asset. Assets to be disposed of are separately presented in the balance sheet and reported at the lower of the carrying amount and the fair value less costs to sell, and are no longer amortized.

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

The Company prepared cash flow forecasts for the Gibraltar mine and development projects using price assumptions reflecting prevailing commodity prices and analysts' consensus forecasts, current life-of-mine plans and forecast operating cost profiles. The analysis was based on a life of mine of 24 years, using long-term price assumptions of US\$1.75 per pound of copper and US\$12 per pound of molybdenum as well as a long-term foreign exchange of \$1.23 CAD to \$1 USD. No impairment was identified for the Gibraltar Mine and the Company's other exploration projects as at December 31, 2008.

Management estimates of mineral prices, recoverable reserves, and operating, capital and reclamation costs used in impairment tests are subject to certain risks and uncertainties that may affect the recoverability of mineral property costs. Although management has made its best estimate of these factors, it is possible that changes could occur in the future that could adversely affect management's estimate of the net cash flow from its assets.

(j) *Share capital*

The Company records proceeds from share issuances net of issue costs. Shares issued for consideration other than cash are valued at the quoted market price on the date of issue.

The proceeds, net of issue costs, from common shares issued pursuant to flow-through share financing agreements are credited to share capital and the tax benefits of these exploration expenditures are transferred to the purchaser of the shares.

(k) *Stock-based compensation*

The Company has a share option plan which is described in note 17(c). The Company records all stock-based payments using the fair value method. Under the fair value method, stock-based payments are measured at the fair value of the consideration received or the fair value of the equity instruments issued or liabilities incurred, whichever is more reliably measurable, and are charged to operations over the vesting period. The offset is credited to contributed surplus.

Consideration received on the exercise of stock options is recorded as share capital and the related contributed surplus is transferred to share capital.

(l) *Income taxes*

The Company uses the asset and liability method of accounting for income taxes. Under this method, future income tax assets and liabilities are computed based on differences between the carrying amounts of assets and liabilities on the balance sheet and their corresponding tax values, generally using the substantively enacted or enacted income tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. Future income tax assets also result from unused loss carry forwards, resource-related pools, and other deductions. Future tax assets are recognized to the extent that they are considered more likely than not to be realized. The valuation of future income tax assets is adjusted, if necessary, by the use of a valuation allowance to reflect the estimated realizable amount.

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

(m) Functional currency and foreign currency translations

The Company's functional currency is the Canadian dollar as the Canadian dollar is the currency of the primary economic environment in which the Company operates. While the Company receives its metal sales revenues in United States dollars, the majority of the Company's supplies, labor, and services are denominated in Canadian dollars. All of the business operations of the Company are located in Canada. A majority of the Company's financings are in Canadian dollars.

Foreign currency monetary assets and liabilities are translated into Canadian dollars at the exchange rate in effect at the balance sheet date. Non-monetary assets, liabilities, revenues and expenses are translated into Canadian dollars at the rate of exchange prevailing on the respective dates of the transactions. Foreign exchange gains and losses are included in earnings.

For operations considered self-sustaining, of which the Company has none currently, foreign currency assets and liabilities are translated into Canadian dollars at the exchange rate in effect at the balance sheet date. Revenues and expenses are translated at the average rate for the fiscal period. The resulting foreign exchange gains and losses are accumulated in a separate component of shareholders' equity until there has been a realized reduction in the net investment in such operations.

(n) Earnings (loss) per common share

Basic earnings (loss) per common share are based on the weighted average number of common shares outstanding during the period.

Diluted earnings (loss) per share is calculated using the treasury stock method, whereby all "in the money" options, warrants and equivalents are assumed to have been exercised at the beginning of the period and the proceeds from the exercise are assumed to have been used to purchase common shares at the average market price during the year. Dilution for convertible bonds and debentures is calculated on an if-converted basis.

(o) Variable interest entities

The Company accounts for variable interest entities ("VIE") in accordance with Canadian Institute of Chartered Accountants ("CICA") Accounting Guideline 15, "Consolidation of Variable Interest Entities" ("AcG15"). AcG15 prescribes the application of consolidation principles for entities that meet the definition of a VIE. An enterprise holding other than a voting interest in a VIE could, subject to certain conditions, be required to consolidate the VIE if it is considered its primary beneficiary whereby it would absorb the majority of the VIE's expected losses, receive the majority of its expected residual returns, or both.

(p) Use of estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

expenses during the reporting year. Significant areas requiring the use of management estimates relate to the impairment of mineral property interests and plant and equipment, the balances of reclamation liability, income taxes, valuation allowances for future income tax assets, rates for depletion, depreciation and amortization, the assumptions used in computing stock-based compensation, the fair value of the option to convert the debenture into common shares and future cash flows related thereto, receivables from sales of concentrate and valuation of concentrate inventory, and the determination of mineral reserves and mine life. Actual results could differ from these estimates.

(q) Segment disclosures

The Company operates in a single reportable operating segment, the exploration, development and operation of mineral property interests, within the geographic area of British Columbia, Canada.

(r) Comparative figures

Certain of the prior years' comparative figures have been reclassified to conform with the presentation adopted for the current year.

4. CHANGES IN ACCOUNTING POLICY

The Company adopted the following new accounting standards issued by the CICA relating to financial instruments. As required by the transitional provisions of these new standards, these new standards have been adopted on a prospective basis with no restatement to prior period financial statements.

(a) Accounting Changes (Section 1506)

This standard establishes criteria for changing accounting policies, together with the accounting treatment and disclosure of changes in accounting policies, changes in accounting estimates and correction of errors. As a result, changes in accounting policies are only permitted when required by a primary source of GAAP or when the change will result in more reliable and more relevant information. Changes in accounting estimates during the period resulting from the increase in the life of the Gibraltar mine are disclosed in notes 10 and 15.

(b) Capital Disclosures (Section 1535)

This standard requires disclosure of an entity's objectives, policies and processes for managing capital, quantitative data about what the entity regards as capital and whether the entity has complied with any externally imposed capital requirements and, if it has not complied, the consequences of such non-compliance. These disclosures are presented in note 6(a).

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

(c) *Financial Instruments – Disclosure (Section 3862) and Presentation (Section 3863)*

These standards replace CICA 3861, "*Financial Instruments – Disclosure and Presentation*". These new standards require entities to disclose quantitative and qualitative information that enable users to evaluate the significance of financial instruments on the Company's financial performance, and the nature and extent of risks arising from financial instruments to which the Company is exposed during the year and at the balance sheet date. In addition, disclosure is required of management's objectives, policies and procedures for managing these risks. These disclosures are presented in note 6(b) and (c).

(d) *Inventories (Section 3031)*

This standard replaces the existing Section 3030 with the same title and harmonizes accounting for inventories under Canadian GAAP with International Financial Reporting Standards ("IFRS"). This standard requires that inventories be measured at the lower of cost and net realizable value, and includes guidance on the determination of cost, including the allocation of overheads and other costs. The standard also requires that similar inventories within a consolidated group be measured using the same method. It also requires the reversal of previous write-downs to net realizable value when there is a subsequent increase in the value of inventories. The Company adopted this standard during the current period and determined that there was no significant impact on the financial statements.

(e) *Going Concern – Amendments to Section 1400*

CICA Section 1400, "General Standards of Financial Statement Presentation", was amended to include requirements to assess and disclose an entity's ability to continue as a going concern. The Company has assessed its ability to continue as a going concern and concluded that it will be able to continue as a going concern (note 1).

New Accounting Standards Not Yet Adopted

(f) *International Financial Reporting Standards ("IFRS")*

The Canadian Accounting Standards Board ("AcSB") has announced its decision to replace Canadian generally accepted accounting principles ("Canadian GAAP") with International Financial Reporting Standards ("IFRS") for all Canadian publicly-listed companies. The AcSB announced that the changeover date will commence for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The transition date for the Company to changeover to IFRS will be January 1, 2011. Therefore, the IFRS adoption will require the restatement for comparative purposes of amounts reported by the Company for the year ended December 31, 2010. The Company is currently in the process of developing an IFRS conversion plan and evaluating the impact of the transition to IFRS.

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

(g) *Section 3064 – Goodwill and Intangibles*

The AcSB issued CICA Handbook Section 3064, which replaces Section 3062, “*Goodwill and Other Intangible Assets*”, and Section 3450, “*Research and Development Costs*”. This new section establishes standards for the recognition, measurement, presentation and disclosure of goodwill subsequent to its initial recognition and of intangible assets. Standards concerning goodwill remain unchanged from the standards included in the previous Section 3062. The section applies to interim and annual financial statements relating to fiscal years beginning on or after October 1, 2008. The Company is currently evaluating the impact of this new standard and anticipates this standard will have no significant impact on the financial statements.

5. INVENTORY

	As at December 31 2008	As at September 30 2007
Copper concentrate	\$ 6,508	\$ 6,623
Ore in process	1,120	2,320
Materials and supplies	12,100	8,510
Copper cathode	612	605
	\$ 20,340	\$ 18,058

At December 31, 2008, the Company recorded an adjustment of \$1,504 to reduce the concentrate inventory to its net realizable value (2007 – \$nil).

6. CAPITAL MANAGEMENT AND FINANCIAL INSTRUMENTS

(a) *Capital Management Objectives*

The Company's primary objectives when managing capital are to safeguard the Company's ability to continue as a going concern, so that it can continue to provide returns for shareholders, and to have sufficient funds on hand for business opportunities as they arise.

The Company considers the components of shareholders' equity, as well as its cash and equivalents, credit facilities and convertible debt as capital. The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue equity, sell assets, or return capital to shareholders as well as issue or repay debt. As at December 31, 2008, the Company is subject to externally-imposed capital requirements in the form of bank covenants relating to the bank indebtedness (note 13) and restrictions on certain of its cash balances (note 11).

In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are approved by the Board of Directors.

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

The Company's investment policy is to invest its cash in highly liquid short-term interest-bearing investments, having maturity dates of three months or less from the date of acquisition, that are readily convertible to known amounts of cash.

There were no changes to the Company's approach to capital management during the fifteen months ended December 31, 2008 and the Company expects it will be able to raise sufficient capital resources to carry out its plans of operations for fiscal 2009 as disclosed in note 1.

(b) *Carrying Amounts and Fair Values of Financial Instrument*

The fair value of a financial instrument is the price at which a party would accept the rights and/or obligations of the financial instrument from an independent third party. Given the varying influencing factors, the reported fair values are only indicators of the prices that may actually be realized for these financial instruments.

The fair values of the tracking preferred shares are not readily determinable with sufficient reliability due to the difficulty in obtaining appropriate market information. It is not practicable to determine the fair value of the investment and advances from related parties because of the related party nature of such amounts and the absence of a secondary market for such instruments. The fair values of the promissory note are not readily determinable with sufficient reliability due to the uncertainty around the maturities and the future cash flows associated with the promissory note.

Aside from the financial assets mentioned above, the carrying amounts of the Company's other financial assets approximate their fair values. The following tables show the estimated fair values of the financial assets:

	Estimated fair value as at	
	December 31, 2008	September 30, 2007
Cash and equivalents	\$ 4,587	\$ 37,636
Restricted cash	4,400	4,400
Held for trading	\$ 8,987	\$ 42,036
Accounts receivable	\$ 4,606	\$ 12,021
Loans and receivables	\$ 4,606	\$ 12,021
Marketable securities and investments	\$ 3,138	\$ 18,542
Reclamation deposits	32,396	33,396
Available for sale financial assets	\$ 35,534	\$ 51,938
Total financial assets	\$ 49,127	\$ 105,995

The fair value of marketable securities and investments and reclamation deposits represents the market value of quoted investments.

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

The fair values of financial liabilities are as follows:

	Estimated fair value as at	
	December 31, 2008	September 30, 2007
Bank Indebtedness	\$ 5,737	\$ –
Accounts payable and accrued liabilities	53,036	30,435
Advances due to a related party	1,772	–
Convertible debt	33,329	41,008
	<u>\$ 93,874</u>	<u>\$ 71,443</u>

At December 31, 2008, all the Company's financial liabilities were classified as other financial liabilities and carried at amortized cost. The fair values of the convertible debt were determined by discounting the stream of future payments of interest and principal at 12.5% which approximates the Company's current borrowing rate.

(c) *Financial Instrument Risk Exposure and Risk Management*

The Company is exposed in varying degrees of financial instrument related risks. The Board approves and monitors the risk management processes, including treasury policies, counterparty limits, controlling and reporting structures. The types of risk exposure and the way in which such exposure is managed are provided as follows.

(i) *Credit Risk*

Credit risk is the risk of potential loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its liquid financial assets including cash and equivalents, restricted cash, reclamation deposits, promissory note and accounts receivable. The Company limits exposure to credit risk on liquid financial assets through maintaining its cash and equivalents, restricted cash and reclamation deposits with high-credit quality financial institutions. The Company does not have financial assets that are invested in asset backed commercial paper.

Substantially all the Company's cash and equivalents are held with one major Canadian financial institution and its subsidiaries. The reclamation trust and the promissory note are each held at different financial institutions from the cash and equivalents.

(ii) *Liquidity Risk*

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company ensures that there is sufficient capital in order to meet short term business requirements, after taking into account cash flows from operations and the Company's holdings of cash and cash equivalents. The Company believes that these sources will be sufficient to cover the likely short and long term cash requirements. The Company's cash and equivalents are invested in business accounts and bankers acceptances, and are available on demand for the Company's programs.

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

The following are the contractual maturities of financial liabilities:

2008	Carrying amount	2009	2010	2011	Over 3 years
Accounts payable and accrued liabilities	\$ 53,036	\$ 53,036	\$ –	\$ –	\$ –
Bank overdraft facility	5,737	5,737			
Amounts due to a related party	1,772	1,772	–	–	–
Convertible debt (note14(a))	35,219	–	–	35,219	–
Total liabilities	\$ 95,764	\$ 60,545	\$ –	\$ 35,219	\$ –

2007	Carrying amount	2008	2009	2010	Over 3 years
Accounts payable and accrued liabilities	\$ 30,435	\$ 30,435	\$ –	\$ –	\$ –
Convertible debt	41,008	–	–	–	41,008
Total liabilities	\$ 71,443	\$ 30,435	\$ –	\$ –	\$ 41,008

(iii) *Market Risk*

The significant market risk exposures to which the Company is exposed are commodity price risk, foreign exchange risk, and interest rate risk.

(a) *Commodity Price Risk*

The value of the Company's mineral resource properties is dependent on the price of copper, gold, molybdenum and niobium and the outlook for these minerals. The Company does not have any hedging or other commodity based risks with respect to its operations.

Market prices for these metals historically have fluctuated widely and are affected by numerous factors outside of the Company's control, including, but not limited to, levels of worldwide production, short-term changes in supply and demand, industrial and retail demand, central bank lending, and forward sales by producers and speculators.

The profitability of the Company's operations is highly correlated to the market price of copper and molybdenum. If copper prices decline for a prolonged period below the cost of production of the Company's operating mine, it may not be economically feasible to continue production.

As at December 31, 2008 and September 30, 2007, the Company had no commodity hedges in place, and consequently, hedge accounting is not used.

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

(b) *Foreign Exchange Risk*

The Company's revenues from the production and sale of copper and molybdenum are denominated in US dollars. The Company's concentrate treatment, refining, and transportation costs are substantially denominated in US dollars. However the Company's operating expenses are incurred primarily in Canadian dollars and its liabilities are denominated primarily in Canadian dollars. Consequently, the Company's operations are subject to currency transaction risk and currency translation risk.

The operating results and the financial position of the Company are reported in Canadian dollars. The fluctuation of the US dollar in relation to the Canadian dollar will, consequently, have an impact upon the reported profitability of the Company and may also affect the value of the Company's assets and liabilities.

As at December 31, 2008 and September 30, 2007, the Company had no foreign currency hedges in place, and consequently, hedge accounting is not used.

The Company's financial assets held in the US dollars (stated in Canadian dollars) were:

Carrying value	December 31, 2008	September 30, 2007
Cash and equivalents	\$ 2,169	\$ 34,717
Accounts receivable	-	6,909
Total financial assets	\$ 2,169	\$ 41,626

The Company's financial liabilities held in the US dollars (stated in Canadian dollars) were:

Carrying value	December 31, 2008	September 30, 2007
Accounts payable and accrued liabilities	\$ 13,227	\$ 765
Convertible debt	35,219	26,693
Total financial liabilities	\$ 48,446	\$ 27,458

The following exchange rates applied during the periods ended December 31, 2008 and September 30, 2007:

	Average rate		Period end spot rate	
	Dec. 31 2008	Sept. 30 2007	Dec. 31 2008	Sept. 30 2007
CAD vs. USD	1.0501	1.1135	1.2180	0.9948

A 10 percent weakening of the Canadian dollar against the US Dollar at December 31, 2008 and September 30, 2007 would have increased net earnings

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remain constant.

	Dec. 31, 2008	Sept. 30, 2007
Net Earnings	\$ 12,613	\$ 14,447

A 10 percent strengthening of the Canadian Dollars against the US Dollar at December 31, 2008 would have had the equal but opposite effect on the amounts shown above, on the basis that all other variables remain constant.

(c) *Interest Rate Risk*

In respect of financial assets, the Company's policy is to invest cash at floating rates of interest in cash equivalents in order to provide liquidity while achieving a satisfactory return for shareholders. Fluctuations in interest rates impact on the value of cash equivalents and reclamation deposits, which are invested in Canadian provincial bonds.

The convertible bonds carry a fixed interest rate of 7.125% per annum and as such are not subject to fluctuations in interest rate. The bank indebtedness carries a variable interest rate at prime rate plus 1%.

The exposure of the Company's financial assets to interest rate risk as at December 31, 2008 is as follows:

	Total	Weighted average effective interest rate (percent)	Weighted average period for which the interest rate is fixed (years)
Financial assets subject to floating interest rates	\$ 8,987	4.0%	N/A
Financial assets subject to fixed interest rates	109,464	6.3%	7.02
Equity investments	3,138	N/A	N/A
Trade and other receivables	4,606	N/A	N/A
Total financial assets	\$ 126,195		

The exposure of the Company's financial assets to interest rate risk as at September 30, 2007 is as follows:

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

	Total	Weighted average effective interest rate (percent)	Weighted average period for which the interest rate is fixed (years)
Financial assets subject to floating interest rates	\$ 42,036	5.4%	N/A
Financial assets subject to fixed interest rates	107,832	5.7%	7.81
Equity investments	18,542	N/A	N/A
Trade and other receivables	12,828	N/A	N/A
Total financial assets	\$ 181,238		

The exposure of the Company's financial liabilities to interest rate risk at December 31, 2008 is as follows:

	Total	Weighted average effective interest rate (percent)	Weighted average period for which the interest rate is fixed (years)	Weighted average period until maturity (years)
Financial liabilities subject to floating interest rates	\$ 5,737	4.0%	N/A	N/A
Financial liabilities subject to fixed interest rates	35,219	7.1%	2.6	2.6
Other liabilities	54,808	N/A	N/A	N/A
Total financial liabilities	\$ 95,764			

The exposure of the Company's financial liabilities to interest rate risk at September 30, 2007 is as follows:

	Total	Weighted average effective interest rate (percent)	Weighted average period for which the interest rate is fixed (years)	Weighted average period until maturity (years)
Financial liabilities subject to fixed interest rates	\$ 26,693	7.1%	3.86	3.86
Non-interest bearing debt	14,315	N/A	N/A	1.83
Other liabilities	30,435	N/A	N/A	N/A
Total financial liabilities	\$ 71,443			

A 10 percent decrease of the prime rate for the year ended December 31, 2008 and September 30, 2007 would have increased net earnings by the amounts shown below. This analysis assumes that all other variables, in particular foreign exchange rates, remain constant.

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

	Dec. 31, 2008	Sept. 30, 2007
Net earnings	\$ 142	\$ 515

A 10 percent increase of the prime rate for the year ended December 31, 2008 and September 30, 2007 would have an the equal but opposite effect on net earnings on the basis that all other variables remain constant.

7. MARKETABLE SECURITIES AND INVESTMENTS

	As at December 31, 2008		
	Cost	Unrealized Gain/(Loss)	Fair Value
Continental Minerals Corporation – Common shares	\$ 9,880	\$ (7,297)	\$ 2,583
Investment in other public companies	409	146	555
	\$ 10,289	\$ (7,151)	\$ 3,138

	As at September 30, 2007		
	Cost	Unrealized Gain/(Loss)	Fair Value
Continental Minerals Corporation – Common shares	\$ 9,880	\$ 2,566	\$ 12,446
Continental Minerals Corporation – Warrants	3,118	(2,232)	886
Investment in other public companies	4,574	636	5,210
	\$ 17,572	\$ 970	\$ 18,542

At September 30, 2006, the Company held a convertible promissory note (“Note”) of Continental Minerals Corporation (“Continental”), a public company which is a related party by virtue of certain common directors. The Note contained a right to participate in Continental’s equity financings at a 5% discount to the price paid by other parties in the financing. In February 2007, the Company redeemed the Note and exercised its pre-emptive right to participate in Continental’s equity financing. The Company received the principal amount of the Note (\$11,500) plus a 5% premium, for total proceeds of \$12,100. The proceeds were used to subscribe for 7,318,182 equity units (“Units”) of Continental at a price of \$1.65 per Unit. Each Unit consisted of one common share of Continental and one Continental common share purchase warrant, exercisable at a price of \$1.80 per share for a one year period from the completion of the financing, thus expiring February 20, 2008. The proceeds paid for the Units were allocated to the common shares and warrants received of Continental based on the pro-rated fair value of the common shares (\$9,880) and warrants (\$3,118) at the time of the financing.

In February 2008, the Continental warrants expired unexercised. To reflect this expiry, a mark-to-market loss of \$886 (year ended September 30, 2007 – loss of \$2,232) was charged to operations. As at December 31, 2008, the Company held 7,827,726 common shares (September 30, 2007 – 7,827,726) and Nil (September 30, 2007 – 7,318,182) share purchase warrants of Continental.

8. ARRANGEMENT AGREEMENT (TRACKING PREFERRED SHARES AND HARMONY GOLD PROPERTY)

In October 2001, the Company and its subsidiary Gibraltar Mines Ltd. ("Gibraltar") completed the acquisition of the Harmony Gold Property and related assets from Continental, for 12,483,916 series "A" non-voting tracking preferred shares of Gibraltar and \$2,230 cash. The tracking preferred shares were recorded at \$26,642, being their then fair value, and are designed to track and capture the value of the Harmony Gold Property and will be redeemed for common shares of Taseko upon a realization event, such as a sale of the Harmony Gold Property to a third party or commercial production at the Harmony Gold Property or, at the option of Gibraltar, if a realization event has not occurred by 2011. Accordingly, the tracking preferred shares have been classified within shareholders' equity on the consolidated balance sheet.

As previously noted, the Gibraltar tracking preferred shares are redeemable for common shares of Taseko upon the occurrence of certain value realization events for the Harmony Gold Property. The tracking preferred shares are redeemable at specified prices per common share of Taseko starting at \$3.39 and escalating by \$0.25 per year, currently at \$5.14 (as of December 31, 2008). If a realization event does not occur on or before October 16, 2011, Gibraltar has the right to redeem the tracking preferred shares for Taseko common shares at a deemed price equal to the greater of the then average 20 day trading price of the common shares of Taseko and \$10.00. The Taseko common shares to be issued to Continental upon a realization event will in turn be distributed pro-rata, after adjustment for any taxes, to the holders of redeemable preferred shares of Continental that were issued to Continental shareholders at the time of the Arrangement Agreement.

9. MINERAL PROPERTY INTERESTS

	December 31 2008	September 30 2007
Gibraltar Copper Mine (note 9(a))	\$ 16,743	\$ 10,062
Prosperity Gold-Copper Property (note 9(b))	1	1
Harmony Gold Property (note 9(c))	1	1
Aley Niobium Property (note 9(e))	8,343	8,343
Oakmont Royalty Interest (note 9(f))	7,520	-
	\$ 32,608	\$ 18,407

(a) *Gibraltar Copper Mine*

In July 1999, the Company acquired a 100% interest in the Gibraltar Copper Mine mineral property, located near Williams Lake, British Columbia, Canada from Boliden Westmin (Canada) Limited ("BWCL") for \$3,325. The acquisition of the Gibraltar Mine, which had been on care and maintenance since 1998, included plant and equipment and supplies inventory of the Gibraltar Mine, and \$8,000 of funds for future reclamation. As part of its 1999 operating permits, the Company had agreed to incur a total of \$4,000 on reclamation and environmental

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

programs during the six year period July 1999 to July 2005. The Gibraltar mine final reclamation and closure plan is updated every five years. The most recent reclamation plan and closure report was approved by the British Columbia Ministry of Energy and Mines in 2004. Pursuant to this approved closure plan, the Ministry agreed that the Company had satisfied the \$4,000 reclamation obligation required under the 1999 operating permits.

The acquisition agreement contained certain indemnification clauses. The \$8,000 of funds set aside for future reclamation was considered a "Qualified Environmental Trust" for Canadian income tax purposes. During the year ended September 30, 2003, the Government of British Columbia released these funds from the Trust, which resulted in an income inclusion to the Company, and consequently resulted in the Company utilizing \$3,570 of tax pools otherwise available to it. The Company has made a claim to BWCL for this estimated tax liability under the indemnification terms of the agreement. No amount has been recognized in these consolidated financial statements related to this claim.

During the year ended September 30, 2004, the Company commenced restart activities and entered into an agreement with Ledcor CMI Ltd. and Ledcor Mining Ltd. (together "Ledcor"), whereby Ledcor would finance certain equipment and commission, restart, and operate the Gibraltar Mine. Ledcor's primary responsibility was the commissioning and the operating of the mine in addition to other aspects of mine operations, including drilling, blasting, loading and hauling of ore and waste as well as the recruitment of personnel and the maintenance of equipment and facilities. Pursuant to the agreement, the Company was required to maintain a bank account with a balance of at least \$5,000 in a "product revenue account", for purposes of providing a working capital reserve for operations and general administrative costs. The Company granted a general security agreement to Ledcor for \$5,800 and a second charge on certain mine equipment with an appraised fair value of at least \$5,800.

In July 2006, the Company effected a notice of voluntary withdrawal from the agreement established with Ledcor. Under this notice, and effective November 2006, the Company assumed responsibility as operator of the Gibraltar mine and paid Ledcor a termination fee of \$3,500. This termination fee was accrued for in the consolidated financial statements for the year ended September 30, 2006 and was paid during the year ended September 30, 2007.

(b) Prosperity Gold-Copper Property

The Company owns 100% of the Prosperity Gold-Copper Property, consisting of 196 mineral claims covering the mineral rights for approximately 85 square km in the Clinton Mining Division in south central British Columbia, Canada.

(c) Harmony Gold Property

Under the terms of an arrangement agreement (note 8), the Company acquired a 100% interest in the Harmony Gold Property in fiscal 2002.

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

(d) *Royalty Agreement (promissory note and royalty obligation)*

In September 2004, the Company entered into agreements with an unrelated investment partnership, Red Mile Resources No. 2 Limited Partnership ("Red Mile"). Gibraltar sold to Red Mile a royalty for \$67,357 cash, which cash was received on September 29, 2004. These funds were subsequently invested in a promissory note with a trust company and the Company pledged the promissory note along with interest earned and to be earned thereon for a total of \$70,200 to secure its royalty obligations under the agreements.

At December 31, 2008, the promissory note amounted to \$77,068 (September 30, 2007 – \$74,436), of which \$3,384 (September 30, 2007 – \$2,086) is current, while the royalty obligation amounted to \$64,357 (September 30, 2007 – \$65,416) of which \$3,384 (September 30, 2007 – \$2,086) is current.

Pursuant to the agreements, the Company received an aggregate of \$10,500 in fees and interest for services performed in relation to the Red Mile transaction, of which \$5,250 was received in each of September and December of 2004, and included in interest and other income.

The amount of \$5,250 received in September 2004 included \$1,750 for indemnifying an affiliate of Red Mile from any claims relating to a breach by Gibraltar under the royalty agreement. The funds received in respect of the indemnification are presented as deferred revenue, and are recognized over the expected remaining life of the royalty agreement, with \$1,006 (September 30, 2007 – \$1,225) remaining as deferred as at December 31, 2008, of which \$175 (September 30, 2007 – \$175) is classified as current.

Annual royalties will be payable by Gibraltar to Red Mile at rates ranging from \$0.01 per pound to \$0.14 per pound of copper produced during the period from the commencement of commercial production (as defined in the agreement) to the later of (i) December 2014 and (ii) five years after the end of commercial production from the mine. For the year ended December 31, 2008, Gibraltar paid a royalty of \$0.0566 (September 30, 2007 – \$0.0555) per pound of copper produced to Red Mile. Gibraltar is entitled to have released to it funds held under the promissory note and interest thereon to fund its royalty obligations to the extent of its royalty payment obligations.

The Company has a pre-emptive option to effectively purchase ("call") the royalty interest by acquiring the Red Mile partnership units at a future date in consideration of a payment which is (i) approximately equal to the funds received (i) by the Company less royalty payments to date, or (ii) fair value, whichever is lower. Under certain circumstances, the investors in Red Mile also have a right to sell ("put") their Red Mile partnership units to the Company at fair value; however, such right is subject to the Company's pre-emptive right to exercise the "call" in advance of any "put" being exercised and completed.

The Company has granted to Red Mile a net profits interest ("NPI"), which survives any "put" or "call" of the Red Mile units. The NPI is applicable for the years 2011 to 2014 and is 2% if the price of copper averages US\$2.50 to US\$2.74 per pound, 3% if the price of copper averages US\$2.75 to US\$2.99 per pound and 4% if the price of copper averages US\$3.00 per pound or greater for any year during that period. The US-dollar pricing amounts specified above are based

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

upon an exchange rate of US\$0.75 for Cdn\$1.00, and shall be adjusted from time to time by any variation of such exchange rates. No NPI is payable until the Company reaches a pre-determined aggregate level of revenues less defined operating costs and expenditures. No NPI is payable at December 31, 2008.

In accordance with AcG15, the Company has determined that the royalty agreement created certain variable interest entities for which the Company holds a variable interest. However, as the Company is not the primary beneficiary under the agreement, it is not required to consolidate any of such entities.

(e) *Aley Niobium Property*

In June 2007, the Company completed the acquisition of all the issued and outstanding shares in the capital of a private company with a project in north-eastern British Columbia, Canada (“the Transaction”), for a total cash consideration to the acquired company’s shareholders of \$1,500 as well as a share settlement to the value of \$2,970 (consisting of 894,730 common shares).

In the above Transaction, the Company also purchased the residual net smelter royalties (“NSR”) from Teck Cominco Metals Limited (“Teck”) for a total cash consideration to Teck of \$300 and the issuance of units with a value of \$835 (consisting of 240,000 common shares and 120,000 warrants). Each warrant is exercisable into one common share at \$3.48 until June 4, 2009.

The following table summarizes the total purchase consideration of Aley and the NSR:

	Amount
Cash	\$ 1,800
Issuance of 1,134,730 common shares	3,642
Issuance of 120,000 warrants	163
Total purchase consideration	\$ 5,605

The total acquisition price has been allocated to the net assets acquired and liabilities assumed as follows:

	Amount
Current assets	\$ 79
Mineral property interests	8,343
Current liabilities	(123)
Future income taxes	(2,694)
Total consideration paid, being cash, common shares and units	\$ 5,605

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

(f) *Purchase of Oakmont Ventures Ltd.*

On May 2, 2008, the Company completed the acquisition of all the issued and outstanding shares in the capital of a private company, Oakmont Ventures Ltd. ("Oakmont"), whose sole asset is the 30% net profits interest in certain claims that are part of the Gibraltar mine property located adjacent to the Gibraltar East pit. The acquisition was completed through the issuance of 1,000,000 common shares of the Company at the value of \$5,220. The acquisition was accounted for under the purchase method.

The following table summarizes the total purchase consideration of Oakmont:

	Amount
Issuance of 1,000,000 common shares	\$ 5,220
Payment of Oakmont's liabilities	302
Total purchase consideration	\$ 5,522

The total acquisition price has been allocated to the net assets acquired and liabilities assumed as follows:

	Amount
Mineral property interests	\$ 7,520
Current liabilities	(43)
Future income taxes	(1,955)
Total consideration paid, being cash, common shares and units	\$ 5,522

The results of operations of this acquired company have been included in the Company's consolidated financial statements from the date of the acquisition.

Social assets	402	–	402	402	–	402
Deferred pre-stripping costs	52,535	2,358	50,177	32,949	–	32,949
Construction in progress	82,542	–	82,542	52,887	–	52,887
Assets under capital lease	17,521	13	17,508	–	–	–
Asset retirement costs (note 15)	–	–	–	1,426	–	1,426
Total Gibraltar mine	\$ 320,895	\$ 22,774	\$ 298,121	\$ 180,897	\$ 15,797	\$ 165,100
Other equipment and leasehold improvements	\$ 386	\$ 103	\$ 283	\$ –	\$ –	\$ –
Mineral property interests (note 9)			32,608			18,407
Net asset retirement obligation adjustment			(6,012)			(6,609)
Mineral properties, plant and equipment			\$ 325,000			\$ 176,898

As at December 31, 2008, approximately \$82,542 (2007 – \$52,887) of plant and equipment is under construction and not being amortized. Amortization recorded during the period reflected changes in accounting estimates during the period resulting from the increase in the life of the Gibraltar mine.

11. RESTRICTED CASH

In February 2007, Taseko issued a standby letter of credit, collateralized by cash in the amount of \$4,400, to British Columbia Hydro and Power Authority (“B.C. Hydro”) to provide security for costs to be incurred by BC Hydro relating to the electrical system reinforcements required for the Gibraltar Expansion Project in accordance with “Credit Support Agreement” between Gibraltar and B.C. Hydro. Under the agreement, the Company is required to submit a standby letter of credit as a guarantee in the amount of \$4,400 in order for B.C. Hydro to initiate procurement of major equipment as part of systems reinforcements. The letter of credit will be released over time, as Gibraltar consumes power.

Amounts due to a related party	As at December 31 2008	As at September 30 2007	
Hunter Dickinson Services Inc.	\$ 1,772	\$ –	

Hunter Dickinson Services Inc. ("HDSI") (formerly Hunter Dickinson Inc.) is a private company owned equally by several public companies, one of which is Taseko. HDSI has certain directors in common with the Company and provides geological, corporate development, administrative and management services to, and incurs third party costs on behalf of, the Company and its subsidiaries on a full cost recovery basis per agreement dated June 1, 2008. Advances are non-interest bearing and due on demand.

13. BANK INDEBTEDNESS

During the fifteen months ended December 31, 2008, the Company signed an overdraft facility with a Canadian financial institution for up to \$10,000. As at December 31, 2008, the Company had drawn \$5,737 from the overdraft facility. The term of the facility bore interest at prime rate plus 1% and was secured against the Company's accounts receivable. The facility agreement stipulated that the facility will be terminated in the event the London Metal Exchange ("LME") monthly cash price of copper reduces below US\$2.00 per pound. The facility was also subject to minimum working capital, interest and debt-to-equity ratio covenants. Subsequent to year-end, due to the decrease in copper prices below US\$2.00, the Company repaid the facility in full.

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

14. CONVERTIBLE DEBT

	December 31 2008	September 30 2007
Liability Component		
Convertible Bonds – August 2006	\$ 35,219	\$ 26,693
Convertible Debenture – NVI	–	14,315
Convertible Debt – Liability Component	\$ 35,219	\$ 41,008
Equity Component		
Convertible Bonds – August 2006	\$ 3,832	\$ 3,832
Convertible Debenture – NVI	–	9,823
Convertible Debt – Equity Component	\$ 3,832	\$ 13,655

(a) *Convertible Bonds – August 2006*

On August 29, 2006 (the “Closing”), the Company issued US\$30,000 in principal amount of five year convertible bonds due in 2011 (the “Bonds”) to qualified institutional buyers (the “Bondholders”). The Bonds are convertible into the Company’s common shares. The Bonds constitute direct, unsubordinated, unsecured, general and unconditional obligations of the Company.

The Bonds were issued at 100% and, if not converted, will be redeemed at maturity at 101%. The Bonds carry coupon interest rates of 7.125% per annum. The Bonds have a “put” right in August 2009 to be redeemed at 100.6%. Due to this “put” right, the Bonds have been accordingly classified as current liabilities as at December 31, 2008. However, the Company has not received any indication from the Bondholders with regards to their intention to exercise the “put” right to date.

The Bonds are convertible at the holder’s option after 40 days from issuance until August 19, 2011 at a conversion price of US\$3.35, or up to 8,955,224 common shares of the Company, which was a premium of approximately 40% over the trading price of the Company’s shares at the time of Closing. At any time after September 12, 2008, the Company will have the right to call for the conversion of the Bonds into the number of shares as set out above, so long as the Company’s shares trade at least 50% above the conversion price for at least 20 business days in any period of 30 consecutive business days.

For accounting purposes, the Bonds contain both a liability component and an equity component, being the holder’s conversion right, which have been separately presented in the consolidated balance sheets. The Company has allocated the US\$30,000 face value of the Bonds to the liability and equity components. At issuance, the Company estimated the fair value of the conversion option by deducting the present value of the future cash outflows of the Bonds from the face value of the principal of the Bonds. The fair value of the liability component was determined by discounting the stream of future payments of interest and principal at the estimated prevailing market rate of 10.5% for a comparable debt instrument that excluded any conversion privilege by

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

the holder. The residual carrying value of the Bonds is required to be accreted to the redemption value of the Bonds to the first redemption date of the Bonds based on an effective annual interest rate of 12%. For the period ended December 31, 2008, interest and accretion relating to the debt totaled \$4,999 (September 30, 2007 – \$3,989).

The continuity of the Bonds is as follows:

	15 months ended December 31, 2008	Year ended September 30, 2007
Present value of convertible bonds		
Beginning of period	\$ 26,693	\$ 29,761
Unrealized foreign exchange loss (gain)	6,328	(3,306)
Finance cost reclassification	–	(1,382)
Accretion for the period	2,198	1,620
End of period	35,219	26,693
Conversion right	3,832	3,832
Convertible bonds	\$ 39,051	\$ 30,525

<i>Convertible Bonds</i>	December 31, 2008	September 30, 2007
Summary of the convertible bond terms		
Principal amount of convertible debenture	US \$30,000	US \$30,000
Price per common share of the unexercised conversion right	US\$ 3.35	US\$ 3.35
Number of common shares potentially issuable under unexercised conversion right	8,955,224	8,955,224

(b) *Convertible Debenture – NVI Mining Ltd (formerly Boliden Westmin (Canada) Limited)*

On July 21, 1999, in connection with the acquisition of the Gibraltar mine, the Company issued a \$17,000 interest-free debenture (the “Debenture”) to NVI Mining Ltd. (“NVI” or formerly Boliden Westmin (Canada) Limited). The Debenture was due on July 21, 2009 and was convertible into common shares of the Company over a 10 year period commencing at a price of \$3.14 per share in year one and escalating by \$0.25 per share per year thereafter. NVI had the right to convert, in part or in whole from time to time, the Debenture into fully paid common shares of the Company from year one to year ten.

On April 2, 2008, NVI issued a notice to the Company to convert the principal amount of the Debenture of \$17,000 at an effective conversion rate of \$5.14 per common share, which would have resulted in 3,307,393 common shares of the Company being issued to NVI. The Company issued 2,612,971 to NVI and a cash payment of \$3,569 in lieu of issuing the remaining 694,422 common shares as full and final settlement to NVI.

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

15. SITE CLOSURE AND RECLAMATION OBLIGATIONS

The continuity of the provision for site closure and reclamation costs related to the Gibraltar mine is as follows:

Balance, September 30, 2005	\$ 17,314
Changes during fiscal 2006:	
Reclamation incurred	(71)
Accretion expense	1,732
Balance, September 30, 2006	\$ 18,975
Changes during fiscal 2007:	
Reclamation incurred	(167)
Accretion expense	1,777
Additional site closure and reclamation obligation recognized	4,449
Reduction in the present value of reclamation obligation due to a revision in mine life	(7,593)
Balance, September 30, 2007	\$ 17,441
Changes during the 15 months ended December 31, 2008:	
Reclamation incurred	(183)
Accretion expense	1,451
Additional site closure and reclamation obligation recognized	366
Reduction in the present value of reclamation obligation due to a revision in mine life	(8,709)
Balance, December 31, 2008	\$ 10,366

During the 15 months ended December 31, 2008, the value of the underlying site closure and reclamation obligation was revised to reflect an increase in the life of the Gibraltar mine. This change resulted in a revision to the timing of undiscounted cash flows associated with the carrying amount of the liability and a reduction in the present value of the site closure and reclamation obligation. The impact of these changes in estimates are:

- an increase to asset retirement costs included in mineral properties, plant and equipment and corresponding increase to reclamation obligation as at December 31, 2008 of \$366 (September 30, 2007 – \$4,449).
- a decrease of \$1,426 (2007 - \$Nil) in asset retirement costs included in mineral properties, plant and equipment
- a decrease as at December 31, 2008 of \$8,709 (September 30, 2007 – \$7,593) in the present value of the reclamation obligation due to an extension in the mine life.
- a gain for the 15 months ended December 31, 2008 of \$6,917 (year ended September 30, 2007 – \$4,570; year ended September 30, 2006 – \$nil).

The new estimated amount of the reclamation costs, adjusted for estimated inflation at 2.5% per year, in 2032 dollars, as at December 31, 2008 is \$90,000 (September 30, 2007 – \$68,400) and is expected to be spent over a period of approximately three years beginning in 2032. The credit-adjusted risk free rates at which the estimated future cash flows have been discounted at 7.1% to 10%, which results in a net present value as at December 31, 2008 of \$10,366 (September 30, 2007 – \$17,441). The accretion for the fifteen months ended December 31, 2008 of \$1,451 (year ended September 30, 2007 – \$1,777; year ended September 30, 2006 – \$1,732) is charged to the statement of operations.

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

As required by regulatory authorities, at December 31, 2008, the Company had cash reclamation deposits totaling \$32,396 (September 30, 2007 – \$33,396) comprised of \$32,152 (September 30, 2007 – \$33,186) for the Gibraltar mine, \$30 (September 30, 2007 – \$30) for the Prosperity project, \$175 (September 30, 2007 – \$175) for the Harmony project and \$39 (September 30, 2007 – \$5) for the Aley Niobium Project. These deposits are invested in government bonds and treasury bills and bear interest at rates ranging from 3.33% to 5.85% per annum. During the 15 months ended December 31, 2008, the Government of British Columbia permitted the Company to withdraw \$5,000 from the Gibraltar mine reclamation deposit in exchange for security on certain equipment of the Gibraltar mine. Subsequent to period-end, the Company obtained further approval and withdrew \$3,900 from the reclamation deposit.

16. CAPITAL LEASE OBLIGATIONS

Included in property, plant and equipment are mining equipment that the Company acquired pursuant to three to four year capital lease agreements.

Capital lease obligations as detailed above are secured over plant and equipment and are repayable in monthly installments. Interest is charged at rates linked to the prevailing prime rate of the relative financial institution mentioned above.

Future minimum lease payments are as follows:

2009	\$ 4,280
2010	4,003
2011	4,003
Thereafter until 2013	6,614
Total minimum lease payments	\$ 18,900
Less: interest portion	(2,476)
Present value of capital lease obligations	\$ 16,424
Current portion	(3,324)
Non-current portion	\$ 13,100

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

17. SHARE CAPITAL

(a) *Authorized*

Authorized share capital of the Company consists of an unlimited number of common shares without par value.

(b) *Private Placements*

In October 2007, the Company completed a short form prospectus offering of 7,115,385 common shares at a price of \$5.20 per common share, and also granted to the underwriters an over-allotment option to purchase up to an additional 1,067,307 common shares at the same price, which over-allotment option was exercised in full, for aggregate gross proceeds to the Company of approximately \$42,500. Financing fees of \$2,553 were paid to the underwriters.

In November 2007, the Company completed a private placement financing of 1,455,100 common shares at a price of \$5.20 per share for gross proceeds of \$7,600. A finder's fee of \$205 was paid in conjunction with the private placement.

In December 2008, the Company completed a private placement financing of 8,571,429 units (the "Units"), with each Unit consisting of one common share and one common share purchase warrant (a "Warrant"), at the issue price of \$0.70 per Unit for gross proceeds of \$6,000. Each Warrant entitles the holder to purchase one common share of the Company (a "Warrant Share") for a period of 24 months at the exercise price of \$0.85 per Warrant Share in the first 12 months and \$0.95 per Warrant Share in the second 12 months, subject to an acceleration of the expiry date to 30 days in the event the Company's common shares trade at a price of \$1.50 or higher for a period of 10 trading days. A finder's fee of 6% of the proceeds of the private placement financing was paid in equivalent Units.

(c) *Share purchase option plan*

The Company has a share purchase option compensation plan (the "Plan") approved by the shareholders that allows it to grant options, subject to regulatory terms and approval, to its directors, employees, officers and consultants. The Plan is based on a maximum number of eligible shares equaling a rolling percentage of up to 10% of the Company's outstanding common shares, calculated from time to time. Pursuant to the Plan, if outstanding options are exercised, or expire, and/or the number of issued and outstanding common shares of the Company increases, the options available to grant under the Plan increase proportionately. The exercise price of each option is set by the Board of Directors at the time of grant and cannot be less than the market price (less permissible discounts) on the Toronto Stock Exchange. Options may have a term of up to ten years and typically terminate 30 days following the termination of the optionee's employment, except in the case of retirement or death. Vesting of options is at the discretion of the Board at the time the options are granted.

	5,707,334	3.40 years	\$ 2.60	2,855,200	\$ 2.10

As at December 31, 2008, 3,962,994 (September 30, 2007 – 2,855,200) of the options outstanding had vested with optionees and were exercisable.

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

The exercise prices of all share purchase options granted during the year were equal to the market price at the grant date. The weighted average assumptions used to estimate the fair value of options during the periods ended:

	2008	2007	2006
Risk free interest rate	2.4%	4%	4%
Expected life	3.52 years	4.20 years	3.93 years
Volatility	65%	68%	71%
Expected dividends	nil	nil	nil

d) Share purchase warrants

The continuity of share purchase warrants during the period ended December 31, 2008 is as follows:

Expiry dates	Exercise price	Outstanding September 30 2007	Issued	Exercised	Expired	Outstanding December 31 2008
December 17, 2010	\$0.85*	–	9,085,715	–	–	9,085,715
February 22, 2008	\$3.48	120,000	–	–	120,000	–

* Exercise price increases to \$0.95 per share purchase warrant after December 17, 2009.

The continuity of share purchase warrants during the year ended September 30, 2007 is as follows:

Expiry dates	Exercise price	Outstanding September 30 2006	Issued	Exercised	Expired	Outstanding September 30 2007
February 22, 2008	\$3.48	–	120,000	–	–	120,000

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

e) Earnings per share

The following table sets forth the computation of diluted earnings per share:

	2008	2007	2006
Earnings available to common shareholders	\$ 3,510	\$ 48,262	\$ 32,916
Effect of assumed conversions:			
Accretion on convertible debenture/bonds	–	1,608	296
Interest on convertible bonds	–	2,368	–
Tax effect on interest on convertible bonds	–	(820)	(73)
Earnings available to common shareholders including assumed conversions:	3,510	51,418	33,139
Basic weighted-average number of shares outstanding (in 000's)	142,062	129,218	113,554
Effect of dilutive securities (in 000's):			
Stock options	5,142	1,438	3,332
Warrants	7,060	2	2,626
Tracking preferred shares	2,664	2,664	2,664
Convertible debenture/bonds	–	8,956	4,286
Diluted weighted-average number of shares outstanding (in 000's)	156,928	142,278	126,462
Earnings per share			
Basic	\$ 0.02	\$ 0.37	\$ 0.29
Diluted	\$ 0.02	\$ 0.36	\$ 0.26

The following table lists the stock options and share issuable under convertible debentures excluded from the computation of diluted earnings per share because their inclusion would have been anti-dilutive for the periods presented (in thousands):

	2008	2007	2006
Stock options	2,626	3,302	2,025
Shares issuable under convertible bonds	8,956	3,308	–

TASEKO MINES LIMITED

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

18. INCOME TAXES

Income tax expense (recovery) differs from the amount which would result from applying the statutory Canadian income tax rates (2008 – 31.4%, 2007 – 34.1% 2006 – 36.6%) for the following reasons:

	2008	2007	2006
Earnings (loss) before income taxes	\$ (2,087)	\$ 87,866	\$ 38,961
Expected tax expense based on statutory rates	(657)	29,980	14,268
Permanent differences	4,044	3,119	2,403
Adjustment to tax reserve	-	-	2,028
Deductions not allowable (allowable) for tax purposes	2,746	8,289	(1,360)
Recognition of previously unrecognized tax assets	(13,613)	(324)	(12,172)
Other	1,883	(1,460)	878
Tax expense (recovery) for the year	\$ (5,597)	\$ 39,604	\$ 6,045
Presented as:			
Current income tax expense (recovery)	\$ (2,151)	\$ 3,959	\$ 4,397
Future income tax expense (recovery)	(3,446)	35,645	1,648
	\$ (5,597)	\$ 39,604	\$ 6,045

As at December 31, 2008 and September 30, 2007, the estimated tax effect of the significant components within the Company's future tax assets were as follows:

	2008	2007
Loss carry forwards	\$ 5,260	\$ 52
Royalty obligation	17,966	19,128
BC mining taxes	3,867	1,839
Unrealized foreign exchange loss	503	-
Unrealized loss recorded in comprehensive income	1,125	-
Other tax pools	230	733
	28,951	21,752
Valuation allowance	-	(13,613)
Future income tax assets	28,951	8,139
Partnership deferral	(6,944)	(5,320)
Reclamation obligation	(7,690)	(5,344)
Plant and equipment	(16,784)	(11,543)
Mineral properties and deferred stripping	(21,332)	(11,856)
Unrealized foreign exchange gain	-	(491)
Unrealized gain recorded in comprehensive income	-	(445)
Net future income tax liability	\$ (23,799)	\$ (26,860)
Current portion – future income tax liability	\$ (8,469)	\$ (5,320)
Long term future income tax liability	(15,330)	(21,540)
Net future income tax liability	\$ (23,799)	\$ (26,860)

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

At December 31, 2008 the Company's tax attributes included capital losses totaling \$1,406 (2007 – \$Nil) which are available indefinitely to offset future taxable capital gains, and resource tax pools totaling approximately \$7,102 (2007 – \$14,000) which are available indefinitely to offset future taxable income. The Company also has non-capital losses of \$18,277 (2007 - \$169) to offset future taxable income which expire in 2027 and 2028 respectively.

The Company has accrued a long term tax provision of \$30,685 (2007 – \$24,645) related to various tax pools.

19. SUPPLEMENTARY CASH FLOW DISCLOSURES

In addition to the non-cash operating, financing and investing activities primarily disclosed, the Company's non-cash operating, financing and investing activities were as follows:

	December 31 2008	September 30 2007	September 30 2006
Acquisition of assets under capital lease	\$ 17,484	\$ –	\$ –
Conversion of convertible debenture (note 14(b))	\$ 21,318	\$ –	\$ –
Increase in asset retirement costs included in mineral properties, plant and equipment (note 15)	\$ –	\$ 1,426	\$ –
Shares and units issued for the purchase of mineral property interests (note 9 (e) & (f))	\$ 5,220	\$ 3,805	\$ –
Shares issued for finders fee	\$ 360	\$ –	\$ –
Fair value of stock options transferred to share capital from contributed surplus on exercise of options	\$ 514	\$ 1,786	\$ 4,869

	December 31 2008	September 30 2007	September 30 2006
Supplemental cash flow information			
Cash paid during the year for			
Interest	\$ 2,844	\$ 2,138	\$ 1,557
Taxes	\$ 315	\$ 63	\$ 1,188

20. COMMITMENTS

(a) Advances for equipment

As at December 31, 2008, the Company paid \$6,381 in advance deposits for equipment to be received in next fiscal year, of which \$499 has been classified as current. The Company is further committed to equipment purchases in relation to its expansion activities in the amount of \$17,375.

TASEKO MINES LIMITED

Notes to Consolidated Financial Statements

For the fifteen months ended December 31, 2008 and years ended September 30, 2007 and 2006

(Expressed in thousands of Canadian Dollars, except for per share and share amounts unless stated otherwise)

(b) Treatment and refining agreement

In April 2008, the Company entered into a six-year agreement commencing in the first fiscal quarter of 2009 and ending on December 31, 2014, with MRI Trading AG ("MRI"), a Swiss-based metal trading company, for the treatment and refining of Gibraltar copper concentrate. Under the terms of the agreement, Taseko has secured long-term, fixed, low cost rates for processing approximately 1.1 million tons of copper concentrate. The Company has the right to price payable copper within the concentrate based on a quotational period, declared by the buyer prior to, and covering each ensuing calendar year.

21. SUBSEQUENT EVENTS

(a) Options grant

On January 12, 2009, the Company granted 2,175,000 options to directors. The options were granted with an exercise price of \$1.15 expiring 5 years after grant.

(b) Credit Suisse Facility Agreement

In February 2009, the Company entered into a US\$30,000 36-month term facility agreement (the "Facility") with Credit Suisse repayable commencing 14 months after the first utilization of the "Facility" in equal bi-monthly installments. The loan bears interest at LIBOR plus 4 percent. Pursuant to security agreements entered into in connection with the Facility, the Company has ceded as security, certain equipment of the Gibraltar Mine and the MRI treatment and refining agreement along with a corporate guarantee.

(c) Equity Financings

On March 26, 2009, the Company announced it had entered into an agreement with a syndicate of underwriters under which the underwriters have agreed to buy from Taseko 13,793,104 common shares at an issue price of \$1.45 per common share (the "Offering") for gross proceeds of approximately \$20,000. The underwriters will have an over-allotment option, exercisable at any time prior to 30 days after the closing date, to acquire up to an additional number of common shares equal to 15% of the number of common shares sold pursuant to the Offering, at the issue price. The Company also announced it intends to issue, via a non-brokered private placement at the same price as the Offering, approximately \$5,000 of common shares (the "Non-Brokered Offering"). Finder's fees will be payable on the Non-Brokered Offering. The net proceeds from the Offering and the Non-Brokered Offering are intended to be used for general working capital and corporate purposes.
